Education and the Politics of Time Ronni Laursen, Miriam Madsen, 2026-01-07

Education and the politics of time: temporal governance in teaching and learning explores how time, its organization, regulation, and lived experience structures education across diverse contexts. Organized into four thematic sections, the book's 17 chapters offer critical analyses and vivid empirical accounts that expose the politics of time in education. The first section, the national and transnational politics of time, shows how reforms and policy agendas impose particular temporal logics on education systems. The second, the politics of institutional time, investigates how preschools, schools, and universities govern everyday life through calendars, timetables, and institutional rhythms. The third, the politics of teachers' time, examines how temporal pressures shape professional work identity and wellbeing. The fourth, the politics of students' time, traces how temporal expectations regulate students' learning trajectories, aspirations, and everyday experiences. Taken together, these chapters reveal how the politics of time shape educational practices in contested ways and toward different ends. With contributions from scholars based in Denmark, Sweden, Finland, Australia, Kenya, Chile, and the USA, the volume situates local cases within wider global dynamics. Rather than treating time as neutral, the book insists on its political character, showing how temporal norms structure identities, possibilities, and inequalities, and how they might be reimagined. *Modeling Economic Growth in Contemporary*

Malaysia Bruno S. Sergi, Abdul Rahman Jaaffar, 2021-02-12 This book considers crucial changes to Malaysian economic areas and social wellbeing. The chapters cover diverse industries such as IT, green technology, retailing, banking, tourism, and hospitality, education, logistics, finance, banking, and many others. *Speculations in Science and Technology*, 1994

Professional Journal of the United States Army, 2014-07 *Military Review*, 2014 **Russia's Posture in Space**

Marco Aliberti, Ksenia Lisitsyna, 2018-06-13 The book sheds new lights on the evolution of Russian space activities with a focus on their strategy of international cooperation. This analysis is carried out in relation to the evolution of the domestic and international dynamics that have been impacting the country's direction in space, with the ultimate goal of providing an assessment on their impact for current and foreseeable Europe-Russia space relations. Russia has traditionally been one of the two main strategic partners for Europe in its space endeavor. Hitherto, long-standing cooperation has been nurtured between the two actors in various areas, from scientific research to space transportation and human spaceflight. In recent

years however a number of endogenous and exogenous developments has triggered significant changes in Russia's space posture These changes are evident in the adjustment of Russia's space policies and programmatic goals in the restructuring of the domestic space industry as well as in the attitude towards international space partnerships
