The Nature of Code Daniel Shiffman, 2024-09-03 All aboard The Coding Train This beginner friendly creative coding tutorial is designed to grow your skills in a fun hands on way as you build simulations of real world phenomena with The Coding Train YouTube star Daniel Shiffman What if you could re create the awe inspiring flocking patterns of birds or the hypnotic dance of fireflies with code For over a decade The Nature of Code has empowered countless readers to do just that bridging the gap between creative expression and programming This innovative guide by Daniel Shiffman creator of the beloved Coding Train welcomes budding and seasoned programmers alike into a world where code meets playful creativity This JavaScript based edition of Shiffman s groundbreaking work gently unfolds the mysteries of the natural world turning complex topics like genetic algorithms physics based simulations and neural networks into accessible and visually stunning creations Embark on this extraordinary adventure with projects involving A physics engine Simulate the push and pull of gravitational attraction Flocking birds Choreograph the mesmerizing dance of a flock Branching trees Grow lifelike and organic tree structures Neural networks Craft intelligent systems that learn and adapt Cellular automata Uncover the magic of self organizing patterns Evolutionary algorithms Play witness to natural selection in your code Shiffman s work has transformed thousands of curious minds into creators breaking down barriers between science art and technology and inviting readers to see code not just as a tool for tasks but as a canvas for boundless creativity Whether you re deciphering the elegant patterns of natural phenomena or crafting your own digital ecosystems Shiffman s guidance is sure to inform and inspire The Nature of Code is not just about coding it s about looking at the natural world in a new way and letting its wonders inspire your next creation Dive in and discover the joy of turning code into art all while mastering coding fundamentals along the way NOTE All examples are written with p5.js a JavaScript library for creative coding and are available on the book s website

Context-Aware Systems and Applications, and Nature of Computation and Communication Phan Cong Vinh, Vangalur Alagar, 2018-12-29 This book constitutes the refereed post conference proceedings of the International Conferences ICCASA and ICTCC 2018 held in November 2018 in Viet Tri City Vietnam The 20 revised full papers presented were carefully selected from 30 submissions The papers of ICCASA cover a wide spectrum in the area of context aware systems CAS is characterized by its self facets such as self organization self configuration self healing self optimization self protection used to dynamically control computing and networking functions The papers of ICTCC cover formal methods for self adaptive systems and discuss natural approaches and techniques for computation and communication

Code as Creative Medium Golan Levin, Tega Brain, 2021-02-02 An essential guide for teaching and learning computational art and design exercises assignments interviews and more than 170 illustrations of creative work This book is an essential resource for art educators and practitioners who want to explore code as a creative medium and serves as a guide for computer scientists transitioning from STEM to STEAM in their syllabi or practice It provides a collection of

classic creative coding prompts and assignments accompanied by annotated examples of both classic and contemporary projects and more than 170 illustrations of creative work and features a set of interviews with leading educators Picking up where standard programming guides leave off the authors highlight alternative programming pedagogies suitable for the art and design oriented classroom including teaching approaches resources and community support structures

Architectonics and Parametric Thinking Frank Jacobus, Angie Carpenter, Rachel Smith Loerts, Antonello Nunzio, Francesco Bedeschi, 2023-07-12 This book is an approachable guide for students and professionals to learn parametric modeling through the lens of architectonics allowing readers to pair fundamental ideas about architecture with parametric thinking Architectonics and Parametric Thinking begins by clearly positioning the potentials of parametric design through a series of chapters written by leaders in their respective industries This helps to situate the vast potential of parametric softwares allowing the reader to understand the full range of what is made possible by working computationally Following this theoretical introduction the book presents a manual that walks readers through the step by step construction of parametric modeling scripts built through an architectonic lens using clear compelling diagrams Each of these diagrams provide textual accompaniment that describes how each new portion of the script is transforming the algorithm as a whole as well as diagrams that show the physical transformation that is taking place as a result of the script s evolution Parametric modeling is radically transforming the design disciplines and will become the primary way designer s generate new products moving forward Written and expertly designed for architecture students and professionals this book provides an interactive approach to teaching the basics of parametric thinking in relation to architecture and design

Evaluating Natural Language Processing Systems Julia Rose Galliers, Karen Sparck Jones, 1993 Part 3 develops a general approach to NLP evaluation aimed at methodologically sound strategies for test and evaluation motivated by comprehensive performance factor identification The analysis throughout the report is supported by extensive illustrative examples
