*Drinking from the Fire Hose* Christopher J Frank,Paul Magnone,2011-09-01 You re sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the presentation Just about everyone these days suffers from information overload the 24 7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It s like trying to drink from a fire hose The question isn t how to stop all those e mails meetings conference calls and fat reports that s impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask the right questions at the right time Whatever field you re in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe s Starbucks Kodak Microsoft

iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe's best scientists generated oceans of data and carefully modeled the cloud's dispersion pattern But no one could answer the essential question Was the concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you'll start having more productive brainstorming sessions You'll answer critical questions faster and find unexpected solutions to important problems And you'll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with

The Ultimate Fantasy Football League, 1993 Bob Chon, Greg Colao, Randy Morrison, Andy Schilling, 1993-06 Ultimate Fantasy Football requires each league member to choose one player from each NFL team each game is therefore important and worth watching By adopting the perspective of the fantasy league participants become interested in far more players often on teams of no particular interest to anyone but their hometown fans

*Cancel The Apocalypse* Andrew Simms, 2013-02-28 Ever get the feeling that things are falling apart You're not alone From bad banks to global warming it can all look hopeless but what if everything could turn out well even better than before What if the only thing holding us back is a lack of imagination and a surplus of old orthodoxies In fascinating and iconoclastic detail on everything from the cash in your pocket to the food on your plate and the shape of our working lives Cancel the Apocalypse describes how the relentless race for economic growth is not always one worth winning how excessive materialism has come at a terrible cost to our environment and hasn't even made us any happier in the process Simms believes passionately in the human capacity for change and shows how the good life remains in our grasp While global warming and financial meltdown might feel like

modern day horsemen of the apocalypse Simms shows how such end of the world scenarios offer us the chance for a new beginning    **PC/Computing** ,1989-07    *Adweek* ,2008-04    *Compute* ,1990    The Wall Street Journal ,2009
