**International Sports Economics Comparisons** Rodney D. Fort, John L. Fizel, 2004-03-30 This book brings together for the first time under a single cover international comparisons of the major topics in sports economics. Contributors are all renowned scholars of the international sports scene in Australia, New Zealand, Brazil, the Pacific Rim, North America, and Europe. The reader will find an overview of sports in particular countries and regions along with comparisons along the major topics of economic importance. In particular, the contributions compare and contrast revenues and costs, labor markets, restrictions and discrimination, market structures, league and association organizations, and outcomes, team profitability, and competitive balance and policy issues, especially competition policy. Aimed primarily at sports scholars, practicing sports professionals, and policymakers, the volume is also well suited for undergraduate sports economics, sports management, and sports law courses.

*Statistical Thinking in Sports* Jim Albert, Ruud H. Koning, 2007-07-12 Since the first athletic events found a fan base, sports and statistics have always maintained a tight and at times mythical relationship. As a way to relay the telling of a game's drama and attest to the prodigious powers of the heroes involved, those reporting on the games tallied up the numbers that they believe best described the action and beat.

**Razor Thin: The Difference Between Winning and Losing** Luis Valdes, 2012-08-27 This book is about excellence. Winners and champions are fascinating. Attaining success is difficult; few are able to achieve it, and fewer still are able to sustain it. This book looks at the greatest athletes and teams of our time and identifies the critical factors in their success. Many books discuss the personality factors involved in success; this book identifies the specific behaviors that make a champion.
