We can expect that games and machines will upgrade for the better when it comes to PCs and video games. However the problem now is that most people own laptops not fully rigged out desktop PCs. Everyone wants to bring in a more mobile approach to everything that a PC offers which also includes gaming. Laptops are mobile PCs made for doing work on the go. You can write your documents, create PowerPoint presentations, organize tables in Excel and more, and gaming isn't out of the equation when it comes to laptops. But the problem with laptops is that they have weaker specs compared to the usual and bulkier desktop PC rigs. In terms of hardware the laptops pale in comparison to desktop PCs. This includes hard drive, RAM, graphics cards, external device support, monitor size and quality, and even the keyboard layout. For software it depends as you can get software upgrades right from the get go when you buy your laptop or from the updates that the manufacturer releases a few times every month. The bottom line is that laptops are not meant for gaming they're more geared for working and surfing the Internet but is that going to stop you from PC gaming? Well it shouldn't. Sure laptops are more of a worker's haven since laptops are meant to be placed on your lap be brought almost anywhere and let you work anytime and anywhere that you prefer. This includes writing, making presentations, creating websites, coding and such things. But from time to time you need

to have a break or two from work Gaming on your laptop is still possible Getting geared properly to get your game on your laptop is crucial if you want to play PC games on your mobile PC And in this book we ll be teaching you on how to properly gear up set up and equip your laptop with the proper hardware software and accessories to make your laptop outshine the rest of the competition in the market when it comes to PC gaming Oh and we re not just talking about the classic PC games that run with mediocre requirements and low hardware specs We re talking about PC games from the past up to the latest PC games that demand only the best If you want to play the latest and the best PC games out today you need to know what to get and how to get it when it comes to gaming on your laptop We re talking about high end games with surreal graphics that you d think impossible to run on a laptop But running these games on a laptop is still possible with the right equipment that is So suit up and gear up here are the tips and know hows that you should take note if you want to game on your humble laptop
