Digital Therapies in Psychosocial Rehabilitation and Mental Health Marques, António,Queirós, Ricardo,2021-12-10 Digital health is the convergence of digital technologies with health to enhance the efficiency of

healthcare delivery and make healthcare more personalized and precise. These technologies generally focus on the development of interconnected health systems to improve the use of computational technologies smart devices computational analysis techniques and communication media to help healthcare professionals and their patients manage illnesses and health risks as well as promote health and well being. Digital tools play a central role in the most promising future healthcare innovations and create tremendous opportunities for a more integrated and value based system along with a stronger focus on patient outcomes and as such having access to the latest research findings and progressions is of paramount importance. Digital Therapies in Psychosocial Rehabilitation and Mental Health introduces the latest digital innovations in the mental health field and points out new ways it can be used in patient care while also delving into some of the limits of its application. It presents a comprehensive state of the art approach to digital mental health technologies and practices within the broad confines of psychosocial and mental health practices and also provides a canvas to discuss emerging digital mental health solutions propelled by the ubiquitous availability of personalized devices and affordable wearable sensors and innovative technologies such as virtual and augmented reality mobile apps robots and intelligent platforms. It is ideal for medical professors and students researchers practitioners of healthcare companies managers and other professionals where digital health technologies can be used.
