The book develops from the theoretical work of Polya and Schoenfeld and explicates how these can be translated to the actual implementation in schools. It represents the work of a group of researchers from the Singapore National Institute of Education after experimenting with it in the Singapore school classrooms. This book includes a set of scheme of work, lesson plans, and a choice of mathematics problems that teachers can actually use in teaching problem solving. Certain pedagogical considerations are developed and suggested in this book. In addition, the book includes an assessment framework on how mathematical problem solving can be assessed.
