Safety concerns everybody!

Always follow the instructions in the machine's operator's manual, which is a supplement to the Service Manual.

The Operator's Manual must always be kept in the cab for easy reference.

Volvo designs and manufactures machines with a high level of safety as well as effectiveness. All this can only be ensured if anyone who is asked to perform service on any of our machines does not read the safety instructions, or does not follow them, e.g., does not replace guards (either on original machine parts instead of using a ladder, goes a field of noise instead of protection or uses the wrong tools for the job).

In order to maximize safety and effectiveness, always use the intended and adapted spare parts for the machine. Using genuine Volvo spare parts is recommended since they are adapted to the machine for highest safety and quality.

Machines which cause accidents, injure people often do.

A safety-conscious person and a well-maintained machine make for a safe, effective and productive combination.

Those who do not follow the safety instructions and observe the warnings in this manual must make sure that their work method is safe. Otherwise, there is a great risk of accidents, perhaps even accidents that result in fatalities.

WARNING

Machine safety

We provide a dozen of safety points throughout the manual. We emphasize that these 'Warnings, do not fail to comply' may be dangerous!
