**Beckett's Industrial Chocolate Manufacture and Use** Steve T. Beckett, Mark S. Fowler, Gregory R. Ziegler, 2017-02-28 Since the publication of the first edition of Industrial Chocolate Manufacture and Use in 1988 it has become the leading technical book for the industry From the beginning it was recognised that the complexity of the chocolate industry means that no single person can be an expert in every aspect of it For example the academic view of a process such as crystallisation can be very different from that of a tempering machine operator so some topics have more than one chapter to take this into account It is also known that the biggest selling chocolate in say the USA tastes very different from that in the UK so the authors in the book were chosen from a wide variety of countries making the book truly international Each new edition is a mixture of updates rewrites and new topics In this book the new subjects include artisan or craft scale production compound chocolates and sensory This book is an essential purchase for all those involved in the manufacture use and sale of chocolate containing products especially for confectionery and chocolate scientists engineers and technologists working both in industry and academia The new edition also boasts two new co editors Mark Fowler and Greg Ziegler both of whom have contributed chapters to previous editions of the book Mark Fowler has had a long career at Nestle UK working in Cocoa and Chocolate

research and development he is retiring in 2013 Greg Ziegler is a professor in the food science department at Penn State University in the USA

**The Science of Sugar Confectionery** William P Edwards, 2015-11-09 Confectionery is a topic close to many people's hearts and its manufacture involves some interesting science The confectionery industry is divided into three classes chocolate flour and sugar confectionery It is the background science of this latter category that is covered in **The Science of Sugar Confectionery** The manufacture of confectionery is not a science based industry as these products have traditionally been created by skilled confectioners working empirically In fact scientific understanding of the production process has only been acquired retroactively Historically however sugar confectionery has had technological synergies with the pharmaceutical industry such as making sugar tablets and applying panned sugar coatings This book gives an introduction to the subject with some basic definitions and commonly used ingredients and then moves on to discuss the chemistry of various types of sugar confectionery These include sugar glasses boiled sweets grained sugar products fondants toffees and fudges hydrocolloids gums pastilles and jellies and concludes with a chapter dedicated to sugar free confectionery
