The Development Factory Unlocking The Potential Of Process Innovation:

The Development Factory Gary P. Pisano,1997 When the pharmaceuticals giant Merck reports promising results for a potential blockbuster drug the story makes the evening news Now at a time when new product development has become critical to success in so many industries The Development Factory proves that process innovation not just product innovation can be the key to competitive edge In this multiyear study of pharmaceutical and biotechnology firms Gary Pisano explores the dynamics of superior product and process development in a highly competitive industry that lives and dies by its R D and depends heavily on rapid time to market His work reveals that behind the success of many new product introductions lies the development of novel process technologies that provide lower costs higher quality and increased flexibility Pisano challenges the widely held product process life cycle view of competition which suggests that industries tend to emphasize either product innovation or process innovation He also questions the notion that there is a conflict between pursuit of product innovation and pursuit of lower costs arguing that product development and process development capabilities are complementary Extending the lessons to a wide variety of manufacturing industries The Development Factory will guide companies toward unlocking the potential of process development and understanding the patterns of organizational behavior and managerial actions that help create and implement new capabilities over time **Development Factory** Gary P.

Pisano,1997 *Process Understanding* Ian Houson,2011-06-09 Process Understanding is the underpinning knowledge that allows the manufacture of chemical entities to be carried out routinely robustly and to the required standard of quality This area has gained in importance over the last few years particularly due to the recent impetus from the USA s Food and Drug Administration This book covers the multidisciplinary aspects required for successful process design safety modeling scale up PAT pilot plant implementation plant design as well the rapidly expanding area of outsourcing In discussing what process understanding means to different disciplines and sectors throughout a product s life cycle this handbook and ready reference reveals the factors important to the development and manufacture of chemicals The book focuses on the fundamental scientific understanding necessary for a smoother technical transfer between the disciplines leading to more effective and efficient process development and manufacturing A range of case studies are used to exemplify and illustrate the main issues raised As a result readers will appreciate that process understanding can deliver a real competitive advantage within the pharmaceuticals and fine chemicals industry This book serves as an aid to meeting the stringent regulations required by the relevant authorities through demonstrable understanding of the underlying science **Managing Product Innovation**

In The Process Industries: From Customer Understanding To Product Launch - Uncover The Intrinsic Nature Of Developing Non-assembled Products Thomas Lager,2024-04-29 This book puts management of product innovation in a corporate strategic perspective and argues that a company s competitive position is strongly related to an underlying unique and continually renewed product innovation work process which drives innovation and delivery of new or improved products

in the marketplace The book will take the reader through a systematic examination of the necessary consecutive steps for companies successful development of non assembled products in the cluster of process industries For readers in search of a seamless easy to use effective formal product innovation work process from customer understanding to product launch this book provides a guiding framework and hands on advice for work process design A novel five phase structural process model of the product innovation work process is initially introduced in order to orchestrate a more dynamic interaction between product and process innovation and the integration of sustainability and product eco design in product design The reader will learn first about the importance of aligning new product ideas with the corporate business model and product innovation strategy during the contextualization phase and then how to transform product ideas into well defined complementary product and process concepts In the movement of product ideas from the conceptualization phase to industrialization the use of pilot planting and production trials for scale up of product and process concepts is further explored To secure a design for processability a novel industrialization sub process is introduced and the integration of complementary development of product and service offerings is further examined The deployment of application development throughout and after product launch is highlighted for an enhancement of product commercialization and a reduction of time to break even for new products
