The Dingo Debate Origins Behaviour And Conservation:

The Dingo Debate Bradley Smith, 2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal the dingo Throughout its existence the dingo has been shaped by its interactions with human societies With this as a central theme the book traces the story of the dingo from its beginnings as a semi domesticated wild dog in South east Asia to its current status as a wild Australian native animal under threat of extinction It describes how dingoes made their way to Australia their subsequent relationship with Indigenous Australians their successful adaption to the Australian landscape and their constant battle against the agricultural industry During these events the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species The book concludes with a discussion of what the future of the dingo in Australia might look like what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co existence The Dingo Debate reveals the real dingo beneath the popular stereotypes providing an account of the dingo's behaviour ecology impacts and management according to scientific and scholarly evidence rather than hearsay This book will appeal to anyone with an interest in Australian natural history wild canids and the relationship between humans and carnivores At Nature's Edge Gunnel Cederlöf, Mahesh

Rangarajan, 2018-09-18 In an epoch when environmental issues make the headlines this is a work that goes beyond the everyday Ecologies as diverse as the Himalayas and the Indian Ocean coast the Negev desert and the former military bases of Vietnam or the Namib desert and the east African savannah all have in common a long time human presence and the many ways people have modified nature With research covering countries from Asia Africa and Australia the authors come together to ask how and why human impacts on nature have grown in scale and pace from a long pre history The chapters in this volume illumine specific patterns and responses across time going beyond an overt centring of the European experience The tapestry of life and the human reshaping of environments evoke both concern and hope making it vital to understand when why and how we came to this particular turn in the road Eschewing easy labels and questioning eurocentrism in today's climate vocabulary this is a volume that will stimulate rethinking among scholars and citizens alike Australian Mammals

Dogs Through Time Susan J. Crockford, 2000 *Canis familiaris* the domestic dog has a long history of relationships with man whether as companion guardian hunter herder ritual being and so on This large collection of papers derives from a symposium at the Eighth International Congress of Archaeozoology held in Victoria Canada in 1998 *BAR International Series*, 1978 **A Symposium on the Dingo** Chris R. Dickman, Daniel Lunney, 2001 *Dingo* Brad Purcell, 2010-09-01 Many present day Australians see the dingo as a threat and a pest to human production systems An alternative viewpoint which is more in tune with Indigenous culture allows others to see the dingo as a means to improve human civilisation The dingo has thus become trapped between the status of pest animal and totemic creature This book helps readers to recognise this dichotomy as a deeper understanding of dingo behaviour is now possible through new technologies which have made it easier to monitor their daily lives Recent research on genetic structure has indicated that dingo purity may be a human construct and the genetic relatedness of wild dingo packs has been analysed for the first time GPS telemetry and passive camera traps are new technologies that provide unique ways to monitor movements of dingoes and analyses of their diet

indicate that dietary shifts occur during the different biological seasons of dingoes showing that they have a functional role in Australian landscapes Dingo brings together more than 50 years of observations to provide a comprehensive portrayal of the life of a dingo Throughout this book dingoes are compared with other hypercarnivores such as wolves and African wild dogs highlighting the similarities between dingoes and other large canid species around the world **Dingo Bold** Rowena
