students graduate students and internships Redesigning the Financial Aid System Robert B. Archibald,2003-05-22 As the cost of higher education continues to rise students and their families find it increasingly difficult to navigate the financial aid maze In Redesigning the Financial Aid System economist Robert Archibald examines the history of the system and its current flaws and he makes a radical proposal for changing the structure of the system Archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer As a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and so have difficulty making a timely choice In addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid Under Archibald s proposed reforms the federal government would assess a student s financial need and provide need based grants while institutions would be responsible for guaranteeing student loans Not only would this new system demystify financial aid and allow students to be better informed about the cost of college earlier in the process but it would greatly simplify the application procedure and prevent financial aid allocation from contributing to the problem of rising tuition costs Archibald s clear explanation of the current system its impact strengths and weaknesses as well as his plans for reform will be of interest to educators administrators students and parents **College Financial Aid For Dummies** Herm Davis,Kennedy,1999-07-15 Would you or your child like to apply for college but aren t sure how you re going to pay for it Has it been years since you ve been in school and you d like to continue your education without going broke Are you overwhelmed and confused by all the financial options available today If you think you have to be rich to go to college think again College

Reinventing Financial Aid Andrew P. Kelly, Sara Goldrick-Rab, 2014 In this provocative volume two experts with very different points of view address the growing concern that student loan programs are not a sustainable solution to the problem of mounting college costs They argue that the time has come to reform the financial aid system so that it is more effective in promoting college affordability access and completion Reinventing Financial Aid provides a thorough critique of the existing financial aid system and identifies the challenges of reform It presents a host of innovations designed to improve grant and loan programs and the processes by which students access them Pushing past current debates it also challenges leaders to think more boldly about policy design examine the assumptions and incentives embedded in the current system and lay the groundwork for a fundamental rethinking of student aid programs While the editors agree that bold new thinking on financial aid policy is needed they do not aim for consensus Instead they have leveraged their differences to flesh out important tensions trade offs and areas of common ground that emerge from innovative approaches to reform The result is a volume that serves as a counterpoint to the incremental approach to financial aid reform that has led to record tuition levels growing student debt and increasing doubts about the value of a college education
