**The Darker Side** Samantha Rowe,2013-02-22 Being held captive for a reason she does not yet know Tori finds out that her upbringing is all a lie She must search and fight her way to the truth before the lies catch up to destroy her and her family *Solve Gorgoni* Pierre V. Comtois,2023-09-15 When duty calls wedded Military Intelligence Science Agents Jules Santos and Manda Mooney have no choice but to accept knowing that they may be the only ones standing between the Terran Consortium and its total destruction At least those were the stakes in previous missions This time however they face a different kind of challenge A sociological political threat promoted by a madman intent on reviving a deadly ideology from the past one so toxic that it cost the lives of millions in centuries past To prevent a repetition of such a tragedy of the total breakdown of Terran society Jules and Manda risk their lives as they follow twin trails from Earth to the edge of known space to stop the new plague from engulfing mankind **The Electrical Experimenter** ,1919 *The Darkest Side of Saturn* Tony Taylor,2014-07-03 It s 1997 at a mountaintop observatory in Southern California where spacecraft navigator Harris Mitchel and astronomer Diana Muse Jones discover a dangerous asteroid which may hit the earth within two decades As the asteroid tumbles through space towards an uncertain impact Harris and Diana fight bitterly over how to announce their discovery When Harris goes public to a skeptical world at the cost of his and Diana s careers he sends their already turbulent relationship into a blaze of conflicting passions As his notoriety builds a fanatical preacher and his unhinged followers stalk him while an obnoxious radio personality provides disruptive help Harris becomes an unwilling Pied Piper for his own overzealous followers hungry for belief and eager for guidance into an uncertain and tumultuous future In this science fiction drama the characters battle each other in contests of Damn your world view against a background of hard science religion romance metaphysical speculation and the forces of nature versus human passions and dreams Meanwhile an asteroid hurtles through the solar system and global salvation or disaster hangs in the balance A courageous and visionary work an instant classic BlueInk Reviews **Rockets** ,1945 **The Darker Side of Virtue** Anson D. **Women Scientists in Fifties Science Fiction Films** Bonnie Noonan,2005-06-01 In the 1950s science was rapidly advancing and so were scientific opportunities for women Modern science fiction films reflected these simultaneous social developments This book proposes that the social ideology of the 1950s which was partly concerned with gender issues saturated the B science fiction films of that era and inspired a new appreciation for the role of women in scientific advancements and other social achievements Drawing on feminist literary and cultural theory the author argues that the emergence of the modern American science fiction film in 1950 and the situation of post World War II female scientists together created a film genre That genre was explicitly amenable to exploring the tension between a woman s place in her home and her place in the work force particularly in scientific fields Early chapters provide a general introduction to the

science fiction genre and specifically describe 1950s B science fiction films as they resonate with concerns proper to feminist theory Subsequent chapters offer detailed historically situated readings of 10 B science fiction films from the 1950s that feature women in science The cinematic representations of female scientists are compared and contrasted with real female professionals of the time illuminating the changing gender dynamics reflected in popular film in the 1950s Films analyzed include *Rocketship X M It Came from Beneath the Sea Them Tarantula The Deadly Mantis Beginning of the End Kronos Cat Women of the Moon World Without End and Queen of Outer Space* *Are We There Yet?* Susan Sessions Rugh, 2008 An entertaining cultural history of the American family vacation during the height of its popularity from 1945 to 1973 Reveals the ways in which the ritual of the family road trip for most middle class Americans became a way of defining what it meant to be and become American *Dark Side of the Moon* Gerard Degroot, 2006-11-01 A selection of the History Scientific American and Quality Paperback Book Clubs For a very brief moment during the 1960s America was moonstruck Boys dreamt of being an astronaut girls dreamed of marrying one Americans drank Tang bought space pens that wrote upside down wore clothes made of space age Mylar and took imaginary rockets to the moon from theme parks scattered around the country But despite the best efforts of a generation of scientists the almost foolhardy heroics of the astronauts and 35 billion dollars the moon turned out to be a place of magnificent desolation to use Buzz Aldrin s words a sterile rock of no purpose to anyone In *Dark Side of the Moon* Gerard J DeGroot reveals how NASA cashed in on the Americans thirst for heroes in an age of discontent and became obsessed with putting men in space The moon mission was sold as a race which America could not afford to lose Landing on the moon it was argued would be good for the economy for politics and for the soul It could even win the Cold War The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind Drawing on meticulous archival research DeGroot cuts through the myths constructed by the Eisenhower Kennedy and Johnson administrations and sustained by NASA ever since He finds a gang of cynics demagogues scheming politicians and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space Exposing the truth behind one of the most revered fictions of American history *Dark Side of the Moon* explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon The effort devoted to the space program was indeed magnificent and its cultural impact was profound but the purpose of the program was as desolate and dry as lunar dust **Rocket to the Moon** Erik Bergaust, E. W. Seabrook Hull, 1958 Two scientists explain how man will probably reach the moon and why the project is important They present arguments for an accelerated program *The Dark Side Rocket* Tom Norton, 2015-03-02 The history of man before and after written language has proven that although of different cultures there is a common denominator This being the belief in a supreme being or Creator Although these Creators have varied in description by various cultures there is a possibility that they are the same entity These variations in beliefs may have been due to misinterpretations of written
