

## Work

When the tool is lifted from the tool holder, the tip of the assembled cartridge will heat up to the selected working temperature.

## Charge Mode

While the tool remains on the tool holder, it charges and the tip will gradually cool down to room temperature.

## Sleep Mode

If Sleep Mode is activated (see section "Settings"), upon placing the tool on its holder, besides charging it enters Sleep Mode. The tip temperature will drop down and remain at Sleep temperature.

## Hibernation Mode

When the tool is away from the tool holder and remains inactive (no movement for at least 10 seconds), the tool goes into Hibernation Mode and the tip temperature gradually cools down to room temperature.

## Automatic Turn Off

If the tool has been inactive for a longer period of time (at least 5 minutes), it automatically turns off.

## Turning the Tool Back On

After automatically turning off, put the tool back on the tool holder to turn it on again.

**Note:** The tool can also be switched off/on manually. Tap the Tool power switch on the display (bottom right) to switch it off/on (if the tool is turned off, it will remain connected up to 5 minutes to the station but will not heat up the cartridge).
