that includes detailed solutions to all the problems in the book. If the reader does not wish to consult these solutions then a brief list of answers is provided in printed form at the end of the book.

I would like to thank my family members for their help and continued support without which this book would not have been possible. I would also like to acknowledge the help of the editor at Springer Verlag, Dr. Thomas Ditzinger, for his assistance in bringing this book out in its present form. Finally, I would like to thank my brother Nicola for preparing most of the line drawings in both editions. In this edition, I am providing two email addresses for my readers to contact me: pkattan@tedata.net/jo and pkattan@lsu.edu. The old email address that appeared in the first edition was cancelled in December 2004. Peter I. Kattan

**Preface to the First Edition**

3 This is a book for people who love finite elements and MATLAB. We will use the popular computer package MATLAB as a matrix calculator for doing finite element analysis. Problems will be solved mainly using MATLAB to carry out the tedious and lengthy matrix calculations in addition to some manual manipulations, especially when applying the boundary conditions. In particular, the steps of the finite element method are emphasized in this book. The reader will not find ready-made MATLAB programs for use as black boxes. Instead, step-by-step solutions of finite element problems are examined in detail using MATLAB.
