work around any single country's rules. Libra could shake whole economies. And Facebook would become the digital identity provider to the world. If you wanted to use money at all, you'd have to go through Facebook. Governments looked at Libra and they saw another 2008 financial crisis in the making. Facebook's plan would have made the company even more entrenched at the cost of broken economies worldwide. Starting with toppling the US dollar, Libra was as incompetent as it was arrogant, and the world stopped it in its tracks. But how did Facebook put forward such a bizarre and ill-considered plan that left every regulator who saw it reeling in horror? And what happens when another company tries the same trick? Or when Facebook won't take no for an answer and releases the cut-down version that they're already calling Libra 2.0? Libra Shrugged is the story of a bad idea. Also covered: Bitcoin and cryptocurrency, the source of all the bad ideas in Libra; Central Bank Digital Currencies, digital versions of official legal tender suddenly fashionable again because of Libra; Facebook's early forays into payments with Facebook Credits and Messenger Payments.
