undermining of public trust in digital institutions and public policy in general The purpose of the project Model AI Law for Ethical Law Strategic Recommendations for the Regulation of Artificial Intelligence is not only to warn against mechanical and little critical copying of foreign regulatory models but also to form a thorough approach adapted to the realities of national jurisdictions based on deep interdisciplinary expertise and comprehensive risk analysis This approach involves considering the legal technical ethical social cultural and medical aspects of AI implementation which makes it possible to consider LLM technology as a multidimensional phenomenon with long term consequences The key idea is that AI laws cannot be the product of the work of narrow profile initiators who are far from a systematic understanding of the technology or authors specializing exclusively in one field law technology medicine etc without proper involvement of related fields Only a broad association of interdisciplinary lawyers highly qualified technical specialists sociologists psychologists doctors ethicists cybersecurity and risk management specialists as part of integrated research groups provides a real opportunity to cover the entire range of direct and indirect risks as well as to predict the long term social economic and political consequences of the development and use of AI The structure of the study provides not only a formal statement of provisions but also sections that define and disclose in detail the fundamental principles of human centeredness transparency accountability non discrimination and cyber resilience taking into account international standards and scientific approaches At the same time these sections are combined with analytical blocks which systematically describe problem areas identified in other countries provide examples of negative consequences of ignoring these principles and formulate recommendations for avoiding such risks in Ukrainian legislation In particular the following critical aspects are emphasized legal gaps and lack of clearly defined enforcement mechanisms that allow individual actors to avoid or minimize liability for the direct or indirect harmful consequences of the use of AI including economic ethical and social losses the lack of a single scientifically based and normatively fixed risk assessment scale which complicates the objective identification of the level of danger of specific AI solutions and creates opportunities for conscious or unintentional manipulations in the classification of systems in particular in order to avoid regulatory requirements or reduce the scope of verification measures lack of effective transparent and legally enshrined mechanisms of public control and independent audit capable of ensuring systematic monitoring objective assessment and public information about the compliance of AI systems with ethical and legal standards ignoring a deep and comprehensive analysis of the psychological emotional and sociocultural impacts of AI on vulnerable populations including children the elderly people with disabilities and other socially sensitive categories which can lead to deepening inequality social exclusion and negative transformations of cultural values weak integration and insufficient regulatory consolidation of internationally recognized technical standards and protocols into legal regulation which complicates the unification of requirements reduces the compatibility of national solutions with global ecosystems and creates risks of technical and legal fragmentation Thus this draft law is not only a draft law in the traditional sense but also a deeply thought out analytical and

regulatory warning designed to become a conceptual guide for future state policy in the field of artificial intelligence Its task is to incorporate a multi level preventive mechanism into AI legislation that would combine preventive adaptive and corrective regulatory tools that can flexibly respond to new technological challenges and ethical dilemmas The implementation of this approach should guarantee not only a formal balance between legal regulation technological innovation and public security but also ensure the stability of this balance in the context of rapid transformations and global competition avoiding strategic and tactical mistakes already made by world leaders in this area **Responsible and Resilient Design for Society, Volume 5** Amaresh Chakrabarti,Vishal Singh,Prasad S. Onkar,Mohammad Shahid,2025-08-30 This book showcases cutting edge research papers from the 10th International Conference on Research into Design ICoRD 2025 the largest in India in this area written by eminent researchers from across the world on design processes technologies methods and tools and their impact on innovation This tenth edition of this biennial conference delves into the multifaceted nature of design showcasing cutting edge research and fostering collaboration It aims to showcase cutting edge research about design to the stakeholders aid the ongoing process of developing and extending the collective vision through emerging research challenges and questions and provide a platform for interaction collaboration and development of the community in order for it to take up the challenges to realize the vision The contemporary world is in the midst of significant shifts encompassing everything from climate change to the rapid advancements in Artificial Intelligence These transformations impact the fabric of everyday human lives and society as a whole In this context design emerges as a crucial player offering a pivotal role in navigating these changes to foster a balanced and just world This conference edition therefore has the theme of Responsible and Resilient Design for Society underscoring the importance of adopting approaches that contribute to building a resilient society while acknowledging the responsibilities that come with being designers and researchers The book will be of interest to researchers professionals and entrepreneurs working in the areas on industrial design manufacturing consumer goods and industrial management who are interested in the new and emerging methods and tools for design of new products systems and services A Collection of Technical Papers ,1987 **Scale Faster with AI and Smart Tech: How to Use Artificial Intelligence to Scale Faster** Silas Mary,2025-02-07 Scale Faster with AI and Smart Tech How to Use Artificial Intelligence to Scale Faster The businesses that thrive in the next decade won t just work harder they ll work smarter by leveraging AI and smart technology to scale faster cut costs and outpace the competition If you re still relying on old school methods while others automate optimize and grow exponentially you re already behind This book is your ultimate guide to using AI to scale your business faster than ever Whether you re a startup founder entrepreneur or business owner you ll learn how to use AI driven tools to automate processes boost efficiency and increase revenue without adding extra work Inside you ll discover AI Powered Growth Strategies how to scale your business without scaling your workload Automation Secrets free up time by automating repetitive tasks Smart Marketing with AI use AI driven
