Advanced Mathematical Techniques in Science and Engineering

Mangey Ram,João Paulo Davim,2022-09-01 In recent years mathematical techniques applied to novel disciplines within the science and engineering have experienced extraordinary growth Advanced Mathematical Techniques in Science and Engineering focusses on a detailed range of mathematics applied within various fields of science and engineering for different tasks Topics of focus include Analysis of Consensus Building Time in Social Groups Modeling of intersystem accidents in critical infrastructure systems Stochastic approaches to analysis and modeling of multi sources and big data Performance evaluation of computational DoS attack on access point in Wireless LANs Ranking methods for decision making under uncertainty Understanding time delay based Modeling Diffusion of technological products Role of soft computing in science and engineering Complex system reliability analysis and optimization Tree growth models in forest ecosystems modellingThis research book can be used as a reference for students in a final year undergraduate engineering course such as mechanical mechatronics industrial computer science information technology etc Furthermore the book can serve as a valuable reference for academics engineers and researchers in these and related subject areas

Privacy-Preserving Machine Learning Jin Li,Ping Li,Zheli Liu,Xiaofeng Chen,Tong Li,2022-03-14 This book provides a thorough overview of the evolution of privacy preserving machine learning schemes over the last ten years after discussing the importance of privacy preserving techniques In response to the diversity of Internet services data services based on machine learning are now available for various applications including risk assessment and image recognition In light of open access to datasets and not fully trusted environments machine learning based applications face enormous security and privacy risks In turn it presents studies conducted to address privacy issues and a series of proposed solutions for ensuring privacy protection in machine learning tasks involving multiple parties In closing the book reviews state of the art privacy preserving techniques and examines the security threats they face

Strategic Risk, Intelligence And Digital Transformation Eduardo Rodriguez,2024-03-19 In this book the study of strategic risk is not only for its control and mitigation using analytics and digital transformation in organizations but also it is about the strategic risks that digital transformation can bring to organizations Strategic risk control is one of the goals in creating intelligent organizations and at the same time it is part of

the appetite for creating smarter organizations to support organizations development Knowledge that is created by data analytics and the capacity to operationalize that knowledge through digital transformation can produce potential sustainable competitive advantages The core of the volume is connecting data analytics and artificial intelligence risk management and digitalization to create strategic intelligence as the capacity of adaptation that organizations need to compete and to succeed Strategic intelligence is a symbiotic work of artificial intelligence business intelligence and competitive intelligence Strategic risk is represented by the probability of having variations in the performance results of the organizations that can limit their capacity to maintain sustainable competitive advantages There is an emphasis in the book about the conversion of models that support data analytics into actions to mitigate strategic risk based on digital transformation This book reviews the steps that organizations have taken in using technology that connects the data analytics modeling process and digital operations such as the shift from the use of statistical learning and machine learning for data analytics to the improvement and use of new technologies The digitalization process is a potential opportunity for organizations however the results are not necessarily good for everyone Hence organizations implement strategic risk control in cloud computing blockchain artificial intelligence and create digital networks that are connected internally and externally to deal with internal and external customers with suppliers and buyers and with competitors and substitutes The new risks appear once new knowledge emerges and is in use but at the same time the new knowledge supports the initiatives to deal with risks arising from novel ways of competing and collaborating *Handbook of Research on Innovations in Database Technologies and Applications: Current and Future Trends* Ferragine, Viviana E.,Doorn, Jorge Horacio,Rivero, Laura C.,2009-02-28 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher
