**Berkeley Physics Course Volume II**  
*Preface to the Solutions Manual*

This manual of solutions will be of interest primarily to one who is interested in working from the second volume of the Berkeley Physics Course. They will, I hope, find the manual a useful supplement to the text. The solutions for the more difficult problems often include some explanation going beyond the bare requirements of the problem. The reader should be well advised to pursue the solutions for the more difficult problems before he consults them—if only to be warned of traps which would interfere seriously when the problems were devised.

The solutions were checked by Thomas Knight, who found some errors and made many valuable suggestions for improvement and clarification. Many instructors who find that the material in this class would be improved if it were used in the second volume of the course will find the manual a valuable addition to the text. Numerical errors may still turn up. Most of such would be easy to find, but would any other suggestion for improvement of or additions to the manual. Please address any suggestions to the underlined at Lyman Laboratory, Harvard University, Cambridge, Mass. 02138.

Appropriate parts of this manual may be photocopied and printed, or with copyright notice displayed, may be reproduced in part in students' class notebooks. We do not, however, recommend that the entire manual be made available to students.
