*The Very Long Game* Heiko Borchert, Torben Schütz, Joseph Verbovszky, 2024-07-18 This open access book is the outcome of a unique multinational effort organized by the Hamburg based Defense AI Observatory DAIO to portray the current state of affairs regarding the use of artificial intelligence AI by armed forces around the world. The contributions span a diverse range of geostrategic contexts by providing in depth case studies on Australia, Canada, China, Denmark, Estonia, Finland, France, Germany, Greece, India, Iran, Israel, Italy, Japan, the Netherlands, Russia, Singapore, South Korea, Spain, Sweden, Taiwan, Turkey, Ukraine, the UK, and the United States. The book does not speculate about the future implications of AI on armed forces but rather discusses how armed forces are currently exploring the potential of this emerging technology. By adopting a uniform analytical framework each case study discusses how armed forces view defense AI, how they are developing AI enhanced solutions adapting existing structures and processes, and funding their defense AI endeavors to what extent defense AI is already fielded and operated, and how soldiers and officers are being trained to work with AI.

*Writing Your Thesis or Dissertation* Morrie Mullins, 2025-06-01 Excellent another book about writing. Nobody Ever. There are lots of books about writing a thesis or dissertation. This is one of them with a twist. Yes, it includes advice about writing, revision, formatting, and so forth. It also includes advice about topics like project management, skills, interpersonal dynamics, and self care. These are all things the author either wasn't told or more likely didn't pay attention to back in the dark ages of the twentieth century when he was in graduate school. It's all important stuff. It's also stuff they may not tell you. Someone should. Tackling a serious subject from a perspective that is sometimes light hearted, sometimes caustic, but always supportive. Dr. Morrie Mullins draws on over 20 years mentoring student theses and dissertations in a book designed to help graduate students succeed. He offers advice to help grad students not just write and defend their thesis or dissertation but to build skills for life.
