This book provides a concise yet comprehensive overview of the broad ranging topics in the field of violence and aggression. It uses a functional approach that acknowledges the evolutionary, cultural, and operant nature of violence and aggression. The book defines the nature of different forms of violence and aggression, examines epidemiology and risk factors, describes biological, cultural, and individual causes, and discusses individual and societal prevention and treatment. Key areas of coverage include: Epidemiology of violence and aggression; Biological and social causes of violence and aggression; Cultural interventions, psychotherapies, and individual biological interventions; The effects of violence and aggression in special populations; Violence and Aggression Integrating Theory, Research, and Practice. This is a must-have resource for researchers, academics, and upper-level undergraduate and graduate students in forensic psychology, public health, criminology, criminal justice, developmental psychology, psychotherapy, counseling, psychiatry, social work, educational policy, and politics, health psychology, nursing, and behavioral therapy/rehabilitation.

*Evidence-based Management of Low Back Pain* Simon Dagenais, Scott Haldeman, 2011-01-01. An interdisciplinary approach enables health care providers to work together. A logical, easy-to-follow organization covers information by intervention type from least invasive to most invasive. Integration of interventions provides information in a clinically useful way so it's easier to consider more than one type of treatment or intervention for low back pain and easier to see which methods should be tried first. 155 illustrations include x-rays, photos, and drawings. Tables and boxes summarize key information. Evidence-based content allows you to make clinical decisions based on the ranking of the best available scientific studies from strongest to weakest. Patient history and examination chapters help in assessing the patient's condition and in ruling out serious pathology before making decisions about specific interventions.
