Advances in Digital Forensics XVIII Gilbert Peterson, Sujeet Shenoi, 2022-07-09 Digital forensics deals with the acquisition, preservation, examination, analysis, and presentation of electronic evidence. Computer networks, cloud computing, smartphones, embedded devices, and the Internet of Things have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence. Digital forensics provides the techniques and tools to articulate this evidence in legal proceedings. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in cyber security investigations; security breaches yield valuable information that can be used to design more secure and resilient systems. Advances in Digital Forensics XVIII describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include:

This book is the eighteenth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers, and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of eleven edited papers from the Eighteenth Annual IFIP WG 11.9 International Conference on Digital Forensics, a fully virtual event held in the winter of 2022.

Donald Trump Jon Huer, 2017-05-24 We in the U.S. have deserved someone like Donald Trump as our president for some time. Until now by a string of luck we had mostly centrist presidents, both Republican and Democratic, some with only a modicum of intelligence and humanity. With Donald Trump, however, we finally ran out of luck and he is our sitting president. Now the spotlight is focused on him, but we easily forget that he is after all a product of his own society. Trump's rise to power owes itself to its own social historical circumstances. For decades now, America's Consumer Society had prepared the American voters, mostly White, to find someone like Trump as their leader by supplying them with around-the-clock distractions that made them feel good, happy, and falsely powerful. Trump's ascendancy could not be possible without our consumption of daily entertainment, which makes us selfish, childish, and idiotic human beings. Such minds are easily affected by anxiety, anger, and vengefulness. In our daily sea of popular entertainment of mass circulation, we have become trash cans. Mental Trash Cans that exist just to process trash that enters and leaves our minds almost at the same time. This wasted mind, America's most celebrated symbol of success, that is created by its best and brightest, keeps us away from one another as we become privatized citizens and neighbors in our individual cocoons, lonely, scared, dumbed down, living and dying our solitary, unconnected lives. Into this vacuum of intelligence and humanity enter Donald Trump, the entertainer, billionaire, now the President, who with his brand of populist Fascism challenges the powers of entrenched Corporate America and all of its mind-captivating arsenal. He successfully conquered White Americans by separating them from non-whites, thus revealing America's nationalism and racism hitherto papered over in its Liberal Capital consumer paradise. The common Americans, whether

White or non white possess two prized items that Corporate and Political America covets and wants to take from them the dollar and the vote The American Masses now as garbage fed children are neither smart nor united enough to protect the two critical weapons of their democracy Trump s presidency proves it *Media Selling* Charles Warner,William Lederer,Brian Moroz,2020-07-17 The must have resource for media selling in today s technology driven environment The revised and updated fifth edition of Media Selling is an essential guide to our technology driven programmatic micro targeted mobile multi channel media ecosystem Today digital advertising has surpassed television as the number one ad investment platform and Google and Facebook dominate the digital advertising marketplace The authors highlight the new sales processes and approaches that will give media salespeople a leg up on the competition in our post Internet media era The book explores the automated programmatic buying and selling of digital ad inventory that is disrupting both media buyers and media salespeople In addition to information on disruptive technologies in media sales the book explores sales ethics communication theory and listening emotional intelligence creating value the principles of persuasion sales stage management guides and sample in person phone and email sales scripts Media Selling offers media sellers a customer first and problem solving sales approach The updated fifth edition Contains insight from digital experts into how 82 5% of digital ad inventory is bought and sold programmatically Reveals how to conduct research on Google Analytics Identifies how media salespeople can offer cross platform and multi channel solutions to prospects advertising and marketing challenge Includes insights into selling and distribution of podcasts Includes links to downloadable case studies presentations and planners on the Media Selling website Includes an extensive Glossary of Digital Advertising terms Written for students in communications radio TV and mass communication Media Selling is the classic work in the field The updated edition provides an indispensable tool for learning training and mastering sales techniques for digital media **Masters of Cosmetic Surgery**
