When Thunder Rolled Ed Rasimus, 2011-09-20 Ed Rasimus straps the reader into the cockpit of an F 105 Thunderchief fighter bomber in his engaging account of the Rolling Thunder campaign in the skies over North Vietnam Between 1965 and 1968 more than 330 F 105s were lost the highest loss rate in Southeast Asia and many pilots were killed captured and wounded because of the Air Force s disastrous tactics The descriptions of Rasimus s one hundred missions some of the most dangerous of the conflict will satisfy anyone addicted to vivid heart stopping aerial combat as will the details of his transformation from a young man paralyzed with self doubt into a battle hardened veteran His unique perspective candid analysis and the sheer power of his narrative rank his memoir with the finest most entertaining of the war

Thud Ridge Jack Broughton, 1969 **Spy Planes, Intruders, and Wild Weasels** Thomas Wildenberg, 2025-10-28 *Spy Planes Intruders and Wild Weasels* examines the emergence of electronic warfare and SEAD as critical components of air strategy during the Vietnam War Utilizing declassified documents and firsthand accounts Thomas Wildenberg provides a scholarly analysis of technological innovation operational adaptation and interagency coordination in the evolution of modern aerial warfare The air war over Vietnam often termed the first high tech air war was the first to feature electronic warfare EW in a decisive role EW served not only as a means of defeating the surface to air missile which was also used extensively for the first time during this conflict but also as a way to improve the offensive and defensive capabilities of U S fighters in air combat *Spy Planes Intruders and Wild Weasels* provides a comprehensive account of this heretofore neglected aspect of air combat history Thomas Wildenberg draws from a wealth of declassified CIA and NSA documents as well as compelling accounts from veterans and technical experts to describe the tactics innovations and impacts of electronic warfare in air combat in Vietnam From the wide scale use of airborne jamming to the creation of aircraft like the EA 6B the first aircraft designed specifically for electronic warfare this definitive work illustrates the importance of EW in the history of the Vietnam War and the development of modern electronic warfare The author traces the impact of EW technologies through key phases of the war including Rolling Thunder Linebacker I and Linebacker II As the war progressed so did the sophistication of electronic warfare techniques It was the first conflict in which the suppression of enemy air defenses and the aircraft

dedicated for this purpose called Wild Weasels became a major component of operational planning and use The book analyzes how U S forces adapted with advanced aircraft and equipment to counter North Vietnam s increasingly sophisticated air defenses Drawing from primary sources the author offers a clear analysis of how electronic warfare changed military tactics intelligence operations and the future of conflict **Airborne** Neil Williams,2022-01-04 Due to his reputation for being able to handle the rarest oldest and most difficult airplanes Neil Williams was called on to fly some of the most famous and demanding aircraft ever built from Spitfire Mosquito Lancaster Sea Fury Yak Harvard and Heinkel Neil Williams experience in these aircraft varied from the exhilaration of a Spitfire first solo the loneliness of being lost at night over the Indian Ocean the catastrophic experience of crashing an aircraft in front of 80 000 air show spectators and most remarkably of all his amazing crash landing following an in flight structural failure a feat which has entered aviation legend and for which he was awarded the Queen s Commendation for Valuable Service in the Air This is a book to inspire a book that captures the true essence adventure and romance of flight **Combat in the Sky** Dong Sy Hung,2023-10-15 Fought in the skies over North Vietnam the air war between Vietnamese People s Air Force VNPFAF and U S airpower lasted nearly eight years with hundreds of thousands of combat missions carried out and nearly four hundred dogfights Combat in the Sky Airpower and the Defense of North Vietnam 1965 1973 is the English edition of the definitive North Vietnamese work on Vietnam War airpower In this book ng S H ng depicts the relevant events in chronological order from the first air battles such as the one at Dragon s Jaw Bridge April 1965 to the Linebacker II Campaign or as it was known by the North Vietnamese the i n Bi n Ph in the Air Campaign December 1972 Dong then writes about the signing of the Paris Peace Accords January 1973 and the VNPFAF s attacks on T n S n Nh t Airfield April 1975 The air war in Vietnam was the first modern conflict in which the two opposing sides used jet combat aircraft equipped with air to air missiles In addition to his analysis of the strategic calculations especially by the North Vietnamese and the operations carried out the author also details the technical characteristics of the weaponry used as well as the changes in tactics applied in each phase of the war In doing so Dong provides the most unique perspective of this aspect of the conflict available in the English language **Red River Valley Fighter Pilots** ,1992-03 **Airpower Applied** John Andreas Olsen,2017-05-15 Airpower Applied reviews the evolution of airpower and its impact on the history of warfare Through a critical examination of twenty nine case studies in which various U S coalitions and Israel played significant roles this book offers perspectives on the political purpose strategic meaning and military importance of airpower By comparing and contrasting more than seventy five years of airpower experience in very different circumstances readers can gain insight into present day thinking on the use of airpower and on warfare The authors all experts in their fields demystify some of airpower s strategic history by extracting the most useful teachings to help military professionals and political leaders understand what airpower has to offer as a continuation of politics by other means The case studies emphasize the importance of connecting policy and airpower operational effectiveness cannot substitute for

poor statecraft As the United States its allies and Israel have seen in their most recent applications of airpower even the most robust and capable air weapon can never be more effective than the strategy and policy it is intended to support

Singing the Vietnam Blues Joseph F. Tusso,1990 The songs of the U S Air Force flyers during the Vietnam War written in the cryptic language of pilots and navigators aloft in their beasts a dozen angels up in the sky uniquely reflect the stark emotions and black humors of that ill fated war Veteran navigator Joseph F Tusso spent fifteen years collecting the lyrics for more than a hundred songs written or sung by U S Air Force flyers from about 1966 through 1969 Many of the songs authors are unknown But their lyrics even such jarring lines as those of Chocolate covered Napalm often are set to popular melodies such as The Wabash Cannonball Some songs have original tunes as well Twenty five of the 148 songs whose lyrics are included here were written by Dick Jonas the premier songwriter of the Vietnam era Air Force Many other songs appear in print for the first time Singing the Vietnam Blues begins with a personal overture that sets the stage for a play of war evoked emotions and lines that are less than sacred more than profane and sometimes poignant Some songs such as the Phu

Cat Alert Pad are based on historical events while others have their origins in popular myths such as Wolf Pack's Houseboy. Whatever the direct source of the songs it is the daily combat rescue or transport missions, the possibility of death and the fear, bravado and competition between pilots, navigators, planes and enemy flyers or bandits that generated the lyrics. Most songs are preceded by Tusso's explanation of each song's origin, other versions, references to current events or inside jokes and sometimes personal insights and memories. A glossary is also included.

Folksongs of the American Fighter Pilot in Southeast Asia, 1967-68 Joseph F. Tusso, 1971 *The Air War in Vietnam*, 1968 **Proceedings - United States Naval Institute** United States Naval Institute, 1988-12 United States Naval Institute Proceedings, 1988 **Air War, Southeast Asia, 1961-1973** Myron J. Smith, 1979 **Thor's Legions** John Frederick Fuller, 1990

This book provides insight into the air force weather history from 1937 to 1987. Author John F. Fuller recounts the history of the Air Weather Service from World War II to the Vietnam conflict, introducing its courageous family of forecasters who provided vital weather support for the nation's armed forces and made notable contributions to the field of meteorology. It approaches controversial events leading up to the D-Day, Hiroshima and Nagasaki forecasts. I'd rate the book a gem as a reference book, especially for weather historians.
