## Ucl Lab Manual:

*From Photography to fMRI* Paula Muhr, 2022-09-01 Hysteria a mysterious disease known since antiquity is said to have ceased to exist Challenging this commonly held view this is the first cross disciplinary study to examine the current functional neuroimaging research into hysteria and compare it to the nineteenth century image based research into the same disorder Paula Muhr s central argument is that both in the nineteenth century and the current neurobiological research on hysteria images have enabled researchers to generate new medical insights Through detailed case studies Muhr traces how different images from photography to functional brain scans have reshaped the historically situated medical understanding of this disorder that defies the mind body dualism

*Chamber Divers* Rachel Lance, 2024-04-16 The previously classified story of the eccentric researchers who invented cutting edge underwater science to lead the Allies to D Day victory In August 1942 more than 7 000 Allied troops rushed the beaches of Normandy France in an all but forgotten landing Only a small fraction survived unscathed It was two summers before D Day and the Allies realized that they were in dire need of underwater intelligence if they wanted to stand a chance of launching another beach invasion and of winning the war Led by the controversial biologists J B S Haldane and Dr Helen Spurway an ingenious team of ragtag scientists worked out of homemade labs during the London Blitz Beneath a rain of bombs they pioneered thrilling advances in underwater reconnaissance through tests done on themselves in painful and potentially fatal experiments Their discoveries led to the safe use of miniature submarines and breathing apparatuses which ultimately let the Allies take the beaches of Normandy Blast injury specialist Dr Rachel Lance unpacks the harrowing narratives of these experiments while bringing to life the men and women whose brilliance and self sacrifice shaped the outcome of the war including their personal relationships with one another and the ways they faced skepticism and danger in their quest to enable Allied troops to breathe underwater The riveting science leading up to D Day has been classified for generations but *Chamber Divers* finally brings these scientists stories and their heroism to light
