*Concrete Solutions* Michael Grantham, 2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions, the 6th International Conference on Concrete Repair, Thessaloniki, Greece, 20-23 June 2016. Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo, France, in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua, Italy, in 2009, with TU Dresden, Germany, in 2011, and with Queen's University, Belfast, Northern Ireland, in 2014. In 2016, Thessaloniki, Greece, hosted the conference partnering with both Aristotle University of Thessaloniki, AUTH, and Democritus University of Thrace, DUTH. The next conference in the series will be held in 2019 in Istanbul.

**Men, Masculinities and Disaster** Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters, too little attention has been paid to how women's or men's disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level. With a foreword from Kenneth Hewitt, an afterword from Raewyn Connell, and contributions from renowned international experts, this book helps address the gap. It explores disasters in diverse environmental, hazard, political and cultural contexts through original research and theoretical reflection, building on the under-utilized orientation of critical men's studies. This body of thought, not previously applied in disaster contexts, explores how men gain, maintain and use power to assert control over women. Contributing authors examine the gender terrain of disasters through men's eyes, considering how diverse forms of masculinities shape men's efforts to respond to and recover from disasters and other climate challenges. The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men. It concludes by examining how

disaster risk can be reduced through men's diverse efforts to challenge hierarchies around gender sexuality disability age and culture     *Chemical Biology Editor's Pick 2024* John D.
