Bunker, 2014-01-14 This new book brings together leading terrorism scholars and defence professionals to discuss the impact of networks on conflict and war Post modern terrorism and topics of global insurgency are also comprehensively covered The text is divided into four sections to cover the key areas introductory overview theory terrorism and global insurgency Al Qaeda focus and networks Eminent contributors include John Arquilla and David Ronfeldt Brian Jenkins Stephen Sloan Graham Turbiville and Max Manwaring This book was previously published as a special issue of the leading journal Low Intensity Conflict and Law Enforcement **Bioregionalism and Global Ethics** Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both
