The SIJORI Cross-Border Region Francis E Hutchinson, Terence Chong, 2016-06-14 Twenty five years ago the governments of Singapore, Malaysia and Indonesia agreed to jointly promote the city state the state of Johor in Malaysia and the Riau Islands in Indonesia. Facilitated by common cultural references, a more distant shared history and complementary attributes, interactions between the three territories developed quickly. Logistics networks have proliferated and production chains link firms based in one location with affiliates or transport facilities in the other territories. These cross border links have enabled all three locations to develop their economies and enjoy rising standards of living. Initially economic in nature, the interactions between Singapore, Johor and the Riau Islands have multiplied and grown deeper. Today people cross the borders to work, go to school or avail of an increasing range of goods and services. New political, social and cultural phenomena have developed. Policymakers in the various territories now need to reconcile economic imperatives and issues of identity and sovereignty. Enabled by their proximity and increasing opportunities, families have also begun to straddle borders with resulting questions about citizenship and belonging. Using the Cross Border Region framework which seeks to analyse these three territories as one entity simultaneously divided and bound together by its borders, this book brings together scholars from a range of disciplines. Its 18 chapters and more than 20 maps examine the interaction between Singapore, Johor and the Riau Islands over the past quarter century and seek to shed light on how these territories could develop in the future

What is not debatable is the importance of the law for resolving disputes about intellectual property.

Today the evolving legal context associated with intellectual property and technological advancements have created competing interests and demands from individuals institutions and even nations The law is often the realm in which these interests and disputes take place with more or less satisfying results Colleges and universities must grapple with not only complex legal issues but also the philosophical and political consequences associated with the conversion of intellectual acts into property This monograph pays special attention to the intellectual property of copyrights and patents It examines how legal parameters competing interests and technological advances take shape in economic political and social contexts that require colleges and universities to make intellectual property central to their operation p 4 of cover
