Exercise researcher and author Ellington Darden has studied exercise and fat loss for more than 40 years. His most recent program combines his previous findings on fat loss and muscle gain with new research on the principles of thermodynamics and heat transfer for a 6 or 12 week plan that will eliminate belly bloat, destroy flab, and stoke metabolism. Integrating his many years of research, the program has had more than 1,137 participants who shed an average of 29.5 pounds of fat and lost 6 inches off their waist or belly. The program consists of four main components: a descending calorie eating plan, strength training workouts, superhydration of the body, and rest, inactivity, and rejuvenating sleep. *Men's Health Killing Fat* takes you step by step through Darden's super-effective strategy. Interspersed with success stories and before and after photos of previous participants, *Killing Fat* will teach you a revolutionary new way to lose weight and keep it off. *Encyclopedia of Diet Fads* Marjolijn Bijlefeld, Sharon K.
