Tibet Wild A Naturalists Journeys On The Roof Of The World:

Tibet Wild George B. Schaller, 2012-10-03 As one of the world's leading field biologists George Schaller has spent much of his life traversing wild and isolated places in his quest to understand and conserve threatened species from mountain gorillas in the Virunga to pandas in the Wolong and snow leopards in the Himalaya Throughout his celebrated career Schaller has spent more time in Tibet than in any other part of the world devoting more than thirty years to the wildlife culture and landscapes that captured his heart and continue to compel him to protect them Tibet Wild is Schaller's account of three decades of exploration in the most remote stretches of Tibet the wide sweeping rangelands of the Chang Tang and the hidden canyons and plunging ravines of the southeastern forests As engaging as he is enlightening Schaller illustrates the daily struggles of a field biologist trying to traverse the impenetrable Chang Tang discover the calving grounds of the chiru or Tibetan antelope and understand the movements of the enigmatic snow leopard As changes in the region accelerated over the years with more roads homes and grazing livestock Schaller watched the clash between wildlife and people become more common and more destructive Thus what began as a purely scientific endeavor became a mission to work with local communities regional leaders and national governments to protect the unique ecological richness and culture of the Tibetan Plateau Whether tracking brown bears penning fables about the tiny pika or promoting a conservation preserve that spans the borders of four nations Schaller has pursued his goal with a persistence and good humor that will inform and charm readers Tibet Wild is an intimate journey through the changing wilderness of Tibet guided by the careful gaze and unwavering passion of a life long naturalist

285 Author s Bleisch William V Full Text **Ecoambiguity, Community, and Development** Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2014-02-19 Ecoambiguity Community and Development takes stock of cultural and environmental contexts in many different regions of the world by exploring literature and film Artists and scholars working in the social ecology environmental justice and postcolonial arenas have long recognized that as soon as we tug on a thread of ecodegradation we generally find it linked to some form of cultural oppression The reverse is also often true In the spirit of postcolonial ecocriticism the studies collected by Scott Slovic R Swarnalatha and Vidya Sarveswaran emphasize the impossibility of disentangling environmental and cultural problems While not all the authors explicitly invoke Karen Thornber s term ecoambiguity or the concepts and terminology of postcolonial ecocriticism their articles frequently bring to light various ironies For example the fact that Ukrainian environmental experience in the twenty first century is defined by one of the world s most infamous industrial disasters the Chernobyl nuclear accident of 1986 yet Ukrainian culture like many throughout the world actually cherishes a profound even animistic attachment to the wonders of nature The repetition of this and other paradoxes in human cultural responses to the more than human world reinforces our sense of the congruities and idiosyncrasies of human culture Every human culture regardless of its condition of economic and industrial development has produced its own version of environmental literature and art but the nuances of this work reflect that culture s precise social and geophysical circumstances In various ways these stories of community and development from across the planet converge and diverge as told and explained by distinguished scholars many of whom come from the cultures represented in these articles **Saving Endangered Species** Robert W. Shumaker, 2020-10-27 The amazing true stories of the greatest wildlife champions of our time Wildlife conservation is at a critical juncture While large charismatic mammals may be the first animals that come to mind the mere 3 000 wild tigers still in existence the giraffes declared endangered for the first time just last year it is not only these magnificent keystone species disappearing A full third of all studied birds reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered including crucial pollinators that sustain worldwide food supply Over 15 000 animal species are now considered to be threatened with extinction There are however bright spots that provide optimism many of them due to the efforts of a small group of scientists and activists In Saving Endangered Species Robert W Shumaker brings together ten conservation heroes seven of them winners of the Indianapolis Prize three of them recipients of the Jane Alexander Global Wildlife Ambassador Award With moving immediacy each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world Bringing to life their work in the field each contributor also explains key concepts in wildlife conservation reveals why they are important and discusses what kinds of work can be done to address biodiversity loss Contributors sharing their stories in their own words include George Schaller one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world s largest wildlife preserve the Arctic National Wildlife Refuge Iain Douglas

Hamilton who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for ivory in Africa Steven Amstrup who discovered the disturbing truth that the sea ice polar bears rely on for traveling hunting and raising their young was disappearing Russell Mittermeier who has discovered over 20 new animal species conducted field work in more than 30 countries around the globe and authored 15 books on biodiversity Harrison Ford Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years Sigourney Weaver three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo This unique book aims to win new recruits inspire biologists and conservationists already in the field and illustrate the profession s fundamental scientific tenets through wildlife champions own exciting narratives Covering issues from reproduction and prey predator relationships to population dynamics and community engagement Saving Endangered Species also addresses such thorny topics as overhunting retaliatory killing by farmers development driven habitat loss and the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright
