Discovered at twelve years old, Madison Beer was one of the first artists to have her entire life documented online. Over the past decade, she has navigated the spotlight as a child through her teenage years and now as a young woman in her twenties. In *The Half of It*, Madison pulls back the curtain to show the behind-the-scenes of her journey from reckoning with mass hate online and the time her private pictures were leaked to battling suicidal thoughts while making her highly acclaimed debut album *Life Support* and her recovery since then. This memoir is an honest and unflinching account of self-love, mental health, and advocacy from one of the fastest-rising musical voices and most influential social media presences of her generation. It hammers home the point more striking and urgent than ever that no matter how close the internet may make us feel to people we truly don't know, the half of it. The Impact of Viral TikTok Trends on Today's Supply Chains Toby Lazear, 2022 The advent of social media has changed the way in which consumers shop drastically and in turn the way in which supply chains function TikTok due to its unique design has constructed an environment where products can become viral with much more ease than seen on any prior social platform As a result companies are met with viral videos

promoting their products entirely unbeknownst to them and without preparation Supply chains must be agile to continue to meet customer demand in times when products cannot stay on shelves long enough to be marketed This thesis serves to advise future companies with recommendations for best practices when it comes to viral products on TikTok As for the research component much of the information found in the literature review stems from outside sources The thesis then goes on to cover both case studies and interviews to analyze specific instances of TikTok viral products and the resulting impact on brands that have experienced such shockwaves Through the research conducted and conversations held conclusions were able to be drawn leading to exposing common pitfalls companies can fall into when dealing with viral products Trendspotting and social listening constantly are now more important than ever as brands must be able to recognize trends before the public does to change the narrative on their own behalf and prepare behind the scenes from a supply chain perspective Having open lines of communication both cross functionally and throughout the supply chain are crucial to ensure strong relationships and ease of flexibility in the event of disruptions Because of the ever changing and growing platform of the app it is inevitable that more companies will soon be experiencing the same cycle and it is better to know the best practices of preparation than be left playing catch up for years to follow
