The book is a cutting edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education with particular reference to the situation in Africa. The target audience for the book includes policy makers practitioners administrators education planners researchers teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work with particular reference to technical and vocational education and training TVET. **Nigerian English** David Jowitt, 2018-11-05

Although the past few decades have witnessed growing interest in varieties of English around the world no study of the Nigerian variety intended for the international market has yet been published. Making use of well known paradigms the book will relate Nigerian English as a Second Language variety to other World Englishes. Its chief overall concern however is to provide a detailed descriptive account of the variety seeking to show what is distinctive about it and also in this perspective distinguishing between more educated and less educated usage. After giving a sociolinguistic profile of Nigeria where English today enjoys a more prominent role than ever before it will examine in turn the phonology morpho syntax and lexico semantics of Nigerian English with samples of written texts from the eighteenth century to the present. It will also give a comprehensive summary of academic research carried out in the field over the past fifty years. In this way the book will provide an introduction to the subject for the benefit of scholars and students in universities in many countries and will serve as a useful companion to other books in De Gruyter Mouton's Dialects of English series.

The subject of foreign assistance in education for developing countries has gained increasing importance in the last twenty years. The fact that the efforts of both donors and recipients of assistance have not been entirely satisfying has resulted in repeated appeals for intensified scientific investigation into this area. This study represents a response to those appeals from the point
