A luxurious and definitive exploration of how and why the Renaissance flourished in Italy for two centuries. The idea of renaissance or rebirth arose in Italy as a way of reviving the art, science, and scholarship of the Classical era. It was also powered by a quest to document artistic reality according to newly discovered scientific and mathematical principles. By the late 15th century, Italy had become the recognized European leader in the fields of painting, architecture, and sculpture. But why was Florence the center of this burgeoning creativity, and how did it spread to other Italian cities? Brimming with vivid reproductions of works by Leonardo, Michelangelo, Botticelli, Raphael, Titian, and others, this book showcases the creative achievements that traveled from Florence to Rome to Venice. Art historian Norbert Wolf explores the influence of secular and religious patronage on artistic development, how the urban structure and way of life allowed for such a rich exchange of ideas, and how ideas of humanism informed artists reaching toward the future while clinging to the ideals of the past. Insightful, accessible, and fascinating, this thoroughly researched book highlights the connections and mutual influences of Florence, Rome, and Venice, as well as their intriguing rivalries and interdependencies. **Architecture in Italy, 1400-1500** Ludwig Heinrich Heydenreich, Paul Davies, 1974

In 15th-century Florence, Brunelleschi's buildings and Alberti's treatise first established the principles of Italian Renaissance architecture in practice and theory. This survey ranges from Brunelleschi's dome for the Florence Cathedral to the works of Bramante and Leonardo in the Quattrocento. Renaissance Architecture J. Quentin Hughes, Norbert Lynton, 2013-09
