Karl Popper, Science and Enlightenment Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world *The Reference Catalogue of Current Literature* ,1910

Kabbalah is an ancient Jewish wisdom that explains the laws of spiritual energy Up until very recently the Kabbalah was reserved for the elite those who only after years of scholarship and practice were allowed to enter this mystical realm However one doesnt need to devote ones life to intense study to reap the rich rewards of the Kabbalah With just a basic understanding of a few key concepts our lives can be enriched immensely We can then begin to fulfill our deepest dreams and reach our most important goals becoming the people we long to become By learning to understand the Sefirot the ten spiritual properties that flow from the cosmic source into our heart we can connect to the universe and profoundly transform our experience of daily life For example Hessed or loving kindness represents the desire to be generous while Gevurah is the desire to focus intently or withhold These properties must be balanced in order for harmony and well being to occur Rabbi Laibl Wolf shows how to maintain that balance and enjoy a healthy and productive life by using simple meditation and creative visualization techniques to grasp the spiritual nature of our life Practical Kabbalah draws upon ancient wisdom but offers a modern interpretation and easy to understand techniques for delving deeper into our selves and our world and for reaping the bounteous gifts that were always meant for us From the Trade Paperback edition *Notes on books* Longmans, Green and co,1897
