Machine Learning for Civil and Environmental Engineers M. Z. Naser, 2023-07-17. Accessible and practical framework for machine learning applications and solutions for civil and environmental engineers. This textbook introduces engineers and engineering students to the applications of artificial intelligence AI, machine learning ML, and machine intelligence MI in relation to civil and environmental engineering projects and problems. Presenting state-of-the-art methodologies and techniques to develop and implement algorithms in the engineering domain. Through real-world projects like analysis and design of structural members, optimizing concrete mixtures for site applications, examining concrete cracking via computer vision, evaluating the response of bridges to hazards, and predicting water quality and energy expenditure in buildings, this textbook offers readers in-depth case studies with solved problems that are commonly faced by civil and environmental engineers. The approaches presented range from simplified to advanced methods, incorporating coding-based and coding-free techniques. Professional engineers and engineering students will find value in the step-by-step examples that are accompanied by sample databases and codes for readers to practice with. Written by a highly qualified professional with significant experience in the field, Machine Learning includes valuable information on the current state of machine learning and causality in civil and environmental engineering as viewed through a scientometrics analysis plus a historical perspective. Supervised vs unsupervised learning for regression, classification, and clustering problems. Explainable and causal methods for practical engineering problems. Database development outlining how an engineer can effectively collect and verify appropriate data to be used in machine intelligence analysis. A framework for machine learning adoption and application covering key questions commonly faced by practitioners. This textbook is a must-have reference for undergraduate, graduate students, and professionals to learn concepts on the use of machine learning for scientists, researchers, and design engineering professionals as a reference guide for undertaking MI design, simulation, and optimization for infrastructure.
