

# Strengths

Strengths are the first element of a SWOT analysis, and it addresses the strengths an organization has currently, representing what it is that a company or project does especially well and how these strengths should be built on in hopes of a stronger future for the organization.

# Weaknesses

What are the things holding a project or business back? Weaknesses refer to an organization's internal weaknesses, which are those that interfere with or limit a company's capability to reach its desired future state. Things an organization does not perform well in or needs to improve on are considered to be weaknesses.

# Threats

Threats are the final element of a SWOT analysis, and they are any external barriers or forces that prevent a company from reaching its objectives. A threat is anything that poses a risk to either the organization itself or the likelihood of its growth or success.

# Opportunities

The third element is opportunities, and these are described as the external factors that an organization is able to benefit from and act upon. Opportunities are realized only once a company makes the decision to act upon them and, therefore, are often the drivers of an organization's growth strategies.
