## **Synthetic Socialism Plastics And Dictatorship In The German Democratic Republic:**

**Synthetic Socialism** Eli Rubin, 2012-09-01 Eli Rubin takes an innovative approach to consumer culture to explore questions of political consensus and consent and the impact of ideology on everyday life in the former East Germany Synthetic Socialism explores the history of East Germany through the production and use of a deceptively simple material plastic Rubin investigates the connections between the communist government its Bauhaus influenced designers its retooled postwar chemical industry and its general consumer population He argues that East Germany was neither a totalitarian state nor a niche society but rather a society shaped by the confluence of unique economic and political circumstances interacting with the concerns of ordinary citizens To East Germans Rubin says plastic was a high technology material a symbol of socialism s scientific and economic superiority over capitalism Most of all the state and its designers argued plastic goods were of a particularly special quality not to be thrown away like products of the wasteful West Rubin demonstrates that this argument was accepted by the mainstream of East German society for whom the modern socialist dimension of a plastics based everyday life had a deep resonance

**The German Democratic Republic** Ned Richardson-Little, 2025-07-24 The German Democratic Republic has come to stand as a symbol of communist tyranny a source of Cold War nostalgia and socialist kitsch and a failed alternative to the worst excesses of 21st century capitalism In this book Ned Richardson Little delves into the central contradictions of the GDR state This book illustrates the fault lines of GDR society the worldviews and experiences of not only those who ruled the GDR but also those who rebelled against the strictures of state socialism and those in between who sought a normal life under dictatorship The German Democratic Republic is a succinct and comprehensive history of East Germany that traces its story from the country s origins as the Soviet Zone of Occupation after World War II through key events such as the 1953 Uprising the building of the Berlin Wall the Helsinki Accords and the collapse of state socialism in 1989 Some of the themes explored include the memory of Nazism and national identity everyday life under dictatorship including consumerism sexuality and racism the global politics of the GDR the diversity of dissenting voices and the competing visions for East Germany s democratic future

**The German Democratic Republic** Peter Grieder, 2012-11-02 A clear concise and thought provoking introduction to the history of East Germany which engages critically with key debates and advances new interpretations of the origins development and demise of the GDR Peter Grieder also offers an original conceptualization of the GDR as a totalitarian welfare state

**Composing the Party Line** David G. Tompkins, 2013-10-15 This book examines the exercise of power in the Stalinist music world as well as the ways in which composers and ordinary people responded to it It presents a comparative inquiry into the relationship between music and politics in the German Democratic Republic and Poland from the aftermath of World War II through Stalin s death in 1953 concluding with the slow process of de Stalinization in the mid to late 1950s The author explores how the Communist parties in both countries expressed their attitudes to music of all kinds and how composers performers and audiences

cooperated with resisted and negotiated these suggestions and demands Based on a deep analysis of the archival and contemporary published sources on state party and professional organizations concerned with musical life Tompkins argues that music as a significant part of cultural production in these countries played a key role in instituting and maintaining the regimes of East Central Europe As part of the Stalinist project to create and control a new socialist identity at the personal as well as collective level the ruling parties in East Germany and Poland sought to saturate public space through the production of music Politically effective ideas and symbols were introduced that furthered their attempts to in the parlance of the day engineer the human soul Music also helped the Communist parties establish legitimacy Extensive state support for musical life encouraged musical elites and audiences to accept the dominant position and political missions of these regimes Party leaders invested considerable resources in the attempt to create an authorized musical language that would secure and maintain hegemony over the cultural and wider social worlds The responses of composers and audiences ran the gamut from enthusiasm to suspicion but indifference was not an option Plastics and Dictatorship in the German Democratic Republic

Eli Rubin,2004 The Socialist Car Lewis H. Siegelbaum,2012-05-15 Across the Soviet Bloc from the 1960s until the collapse of communism the automobile exemplified the tension between the ideological imperatives of political authorities and the aspirations of ordinary citizens For the latter the automobile was the ticket to personal freedom and a piece of the imagined consumer paradise of the West For the authorities the personal car was a private mobile space that challenged the most basic assumptions of the collectivity The socialist car and the car culture that built up around it was the result of an always unstable compromise between official ideology available resources and the desires of an increasingly restless citizenry In The Socialist Car eleven scholars from Europe and North America explore in vivid detail the interface between the motorcar and the state socialist countries of Eastern Europe including the USSR In addition to the metal glass upholstery and plastic from which the Ladas Dacias Trabants and other still extant but aging models were fabricated the socialist car embodied East Europeans longings and compromises hopes and disappointments The socialist car represented both aspirations of overcoming the technological gap between the capitalist first and socialist second worlds and dreams of enhancing personal mobility and status Certain features of automobility shortages and privileges waiting lists and lack of readily available credit the inadequacy of streets and highways prevailed across the Soviet Bloc In this collective history the authors put aside both ridicule and nostalgia in the interest of trying to understand the socialist car in its own context

Divide and Prosper Ray Stokes,2009 Amnesiopolis Eli Rubin,2016-02-04 Amnesiopolis explores the construction of Marzahn the largest prefabricated housing project in East Germany built on the outskirts of East Berlin in the 1970s and 1980s and touted by the regime as the future of socialism It focuses particularly on the experience of East Germans who moved often from crumbling slums left over as a legacy of the nineteenth century into this radically new place one defined by pure functionality and rationality a material manifestation of the utopian promise of socialism Eli Rubin employs

methodologies from critical geography urban history architectural history environmental history and everyday life history to ask whether their experience was a radical break with their personal pasts and the German past Amnesiopolis asks can a dramatic change in spatial and material surroundings sever the links of memory that tie people to their old life narratives and if so does that help build a new socialist mentality in the minds of historical subjects The answer is yes and no as much as the East German state tried to create a completely new socialist settlement divorced of any links to the pre socialist past the massive construction project uncovered the truth buried literally in the ground which was that the urge to colonize the outskirts of Berlin was not new at all Furthermore the construction of a new city out of nothing using repeating identical buildings created a panopticon like effect giving the Stasi the possibility of more complete surveillance than they previously had [Book Review Digest](#) ,2009 [Domus](#) Gio Ponti,2008 Monthly review of architecture interiors designing art

Caldwell,2003-03-27 The introduction of state planning and party dictatorship dramatically altered the environment for social theory in the German Democratic Republic But social thought did not disappear By the mid 1950s East German social theorists discovered the basic contradictions of state socialism that would eventually lead to its collapse the inability of the plan to function without markets and its inability to permit markets the inability of the party state to guarantee the rule of law and yet also the need for a regular system of rules in a modern industrial society and the contradictory philosophical claims of a Marxist Leninist philosophy that rejected idealism and Marxist Leninist dogma with its idealistic claim to know the laws of social modernization Making use of archival sources Caldwell examines the articulation of these analyses their subsequent suppression by party authorities in the late 1950s and their return under the guise of cybernetics in the 1960s [East European Accessions List](#) Library of Congress. **East European Accessions Index** ,1959 [Dissident Marxism and Utopian Eco-Socialism in the German Democratic Republic](#) Alexander Amberger,2024-02-06 Rudolf Bahro Wolfgang Harich and Robert Havemann were probably the best known critics of the DDR s ruling Socialist Unity Party Yet they saw themselves as Marxists and their demands extended far beyond a democratisation of real socialism When environmental issues became more important in the West in the 1970s the Party treated it as an ideological manoeuvre of the class enemy The three dissidents saw things differently they combined socialism and ecology adopting a utopian perspective frowned upon by the state In doing so they created political
