The State Of Nonprofit America:

The State of Nonprofit America Lester M Salamon,2012-05-31 Examines the private nonprofit sector and the tax exempt institutions that make up this sector providing important services and benefits to all Americans with histories behind different institutions and the forces and developments that have buffeted them and what they have done to retain their resilience Provided by publisher *The State of Nonprofit America* Lester M Salamon,2012-05-14 Today America s nonprofit organizations seem caught in a force field buffeted by four impulses voluntarism professionalism civic activism and commercialism Too little attention however has been paid to the significant tensions among these impulses Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole In this second edition of an immensely successful volume Lester Salamon and his colleagues offer an overview of the current state of America s nonprofit sector examining the forces that are shaping its future and identifying the changes that might be needed The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector which faces significant financial challenges during a time when its services are needed more than ever The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment *The State of Nonprofit America* Lester M. Salamon,2004-05-13 The thousands of organizations that comprise America s private nonprofit sector represent a national treasure Yet serious pressures are altering the playing field on which nonprofits operate and many are responding in ways that may undermine their popular support Despite the significance of these developments little has been done to analyze and interpret them in a clear and understandable way Lester M Salamon a leading authority on the nonprofit sector has joined forces with more than a dozen other experts and the Aspen Institute to produce this volume an integrated authoritative assessment of the state of nonprofit America and the key trends affecting its evolution The book is organized into three sections The first summarizes critical trends and issues the second examines each of the sector s major subsectors e g health education social services arts and culture international assistance advocacy the third focuses on major cross cutting trends and issues commercialization changing government policy accountability and demographic and technological imperatives The Resilient Sector will be updated every two years It provides a basic sourcebook for sector leaders the press public officials and citizens concerned about the future of America s nonprofit sector and eager to understand the forces affecting it *The Resilient Sector* Lester M. Salamon,2003 Like the arteries of a living organism nonprofit organizations carry a life force that has long been a centrepiece of American culture a faith in the capacity of individual action to improve the quality of human life They embody two seemingly contradictory impulses at the heart of American character a deep seated commitment to freedom and individual initiative and an equally fundamental realization that people live in communities and consequently have

responsibilities that extend beyond themselves Uniquely among American institutions those in the nonprofit sector blend these competing impulses creating a special class of entities that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment

The Resilient Sector Revisited

Lester M Salamon,2015-08-17 Nonprofit America is one of the least understood segments of national life yet also one of the most crucial Author Lester Salamon who pioneered the empirical study of the nonprofit sector in the United States provides a wealth of new data to paint a compelling picture of a set of institutions being buffeted by a withering set of challenges yet still finding ways to survive and prosper These challenges however are posing enormous risks to the historic character and role of nonprofits Operating in an increasingly competitive environment in which traditional sources of government and philanthropic support are difficult to maintain nonprofits have turned decisively to the market In the process however they may be losing their *raison d'être* sacrificing their most crucial missions and risking loss of public understanding and support To remedy this situation Salamon recommends a renewal strategy for the nation's nonprofit sector that begins with a wider articulation and application of the sector's value proposition the attributes that continue to make it deserving of the special privileges and benefits it enjoys Salamon's pithy and accessible book is perfect for nonprofit boards leaders of charitable foundations government officials and students of the nonprofit sector and of public policy as well as anyone looking for guidance on how we go about dealing with public problems in America's increasingly collaborative system of governance
