The Photographer's Website Manual Philip Andrews,2003 The Internet is the biggest communication tool since the telephone and photographers can benefit from it more than most Many successful photographers now have their own websites whether it be to sell their work or simply exhibit it there is no simpler faster and more effective way to reach an audience at any given time anywhere This book looks at precisely that offering practical advice on setting up a website discussing the technical and aesthetic considerations involved analysing a selection of successful websites and exploring the commercial possibilities of this new ever expanding technology It constitutes a clear and comprehensive guide to all photographers wishing to exhibit their work and further their business by having a Web presence Book jacket *Web Archives and Web Archiving* Asger Harlung,2025-04-08 Web archives are repositories of content preserved from the World Wide Web not to be confused with other types of archives that offer services or content online Web archives preserve content that otherwise tends to disappear or change rapidly which probably makes them the most important initiative towards preservation of cultural heritage in our age Never before have the actions ongoing sentiments trends decision processes in politics business and industry institutions news media entertainment providers interest groups and individuals been documented or preserved at the level of detail offered by ongoing and systematic preservation of the Web with content from all levels of society This book strives to present the underlying methods and reasons for preserving web content with a focus on the principles rather than specific methods that may become obsolete almost as quickly as web pages may disappear and on detailing the nature of the archived results with its potentials and pitfalls *Handbook of Semantic Web Technologies* John Domingue,Dieter Fensel,James A. Hendler,2011-06-19 After years of mostly theoretical research Semantic Web Technologies are now reaching out into application areas like bioinformatics eCommerce eGovernment or Social Webs Applications like genomic ontologies semantic web services automated catalogue alignment ontology matching or blogs and social networks are constantly increasing often driven or at least backed up by companies like Google Amazon YouTube Facebook LinkedIn and others The need to leverage the potential of combining information in a meaningful way in order to be able to benefit from the Web will create further demand for and interest in Semantic Web research This movement based

on the growing maturity of related research results necessitates a reliable reference source from which beginners to the field can draw a first basic knowledge of the main underlying technologies as well as state of the art application areas This handbook put together by three leading authorities in the field and supported by an advisory board of highly reputed researchers fulfils exactly this need It is the first dedicated reference work in this field collecting contributions about both the technical foundations of the Semantic Web as well as their main usage in other scientific fields like life sciences

Schmallegger,2003-02 *Recycling of Used Lead-Acid Batteries* Katherine von Stackelberg,Pamela R. D. Williams,Ernesto Sánchez-Triana,Santiago Enriquez,2022-06-30 This document includes a pragmatic framework for designing representative studies and developing uniform sampling guidelines to support estimates of morbidity that are explicitly linked to exposure to land based contaminants from used lead acid battery recycling ULAB activities A primary goal is to support environmental burden of disease evaluations which attempt to attribute health outcomes to specific sources of pollution The guidelines provide recommendations on the most appropriate and cost effective sampling and analysis methods to ensure the collection of representative population level data sample size recommendations for each contaminant and environmental media biological sampling data household survey data and health outcome data These guidelines focus on small scale ULABs that are known to generate significant amounts of lead waste through the smelting process as well as other metals including arsenic and cadmium A primary concern with lead exposure is the documented association with neurodevelopmental outcomes in children as demonstrated by statistically significant reduced performance on a variety of cognitive tests These associations are evident even in the youngest children and toxicological and epidemiologic data indicate these effects have no threshold Other potential exposures include arsenic and cadmium and exposure to these contaminants is also associated with neurodevelopmental outcomes in children as well as arsenicosis bladder lung and skin cancers and renal outcomes The primary objective of this document is to guide research to assess the relationship between environmental contamination exposures and health outcomes related to a subset of contaminants originating from ULAB activities for particularly vulnerable populations such as children and the general population within a single household in the vicinity of ULAB sites in low and middle income countries To achieve this objective biomonitoring and health outcome data are linked to household survey and environmental data for example soil dust water and agricultural products at the individual level from an exposed population compared to individuals from an unexposed reference population Data on exposures and health outcomes in the same individual across a representative set of individuals is required to support an understanding of the potential impact of ULAB activities on local populations The guidelines can also assist in building local capacity to conduct

environmental assessments following a consistent methodology to facilitate comparability across ULAB sites in different geographic areas Sampling strategies and methods are prioritized given information needs resource availability and other constraints or considerations The document includes a number of supporting appendixes that provide additional resources and references on relevant topics Data obtained following these recommendations can be used to support consistent comparable and standardized community risk and health impact assessments at contaminated sites in low and middle income countries These data can also be used to support economic analyses and risk management decision making for evaluating site cleanup and risk mitigation options in the most cost effective and efficient manner Following these recommendations will facilitate comparisons and meta analyses across studies by standardizing data collection efforts at the community level
