Syntax Robert D. Van Valin (Jr.),Randy J. LaPolla,1997-12-11 An introduction to syntactic theory and analysis A Grammar of Kharia John Peterson,2010-12-10 The present study is an extensive description of Kharia a member of the southern branch of the Munda family spoken in central eastern India It covers virtually all areas of the grammar including phonology morphology syntax as well as a detailed discussion of the lexicon *Head-Driven Phrase Structure Grammar* Stefan Müller,Anne Abeillé,Robert D. Borsley,Jean-Pierre Koenig,2024-11-07 Head Driven Phrase Structure Grammar HPSG is a constraint based or declarative approach to linguistic knowledge which analyses all descriptive levels phonology morphology syntax semantics pragmatics with feature value pairs structure sharing and relational constraints In syntax it assumes that expressions have a single relatively simple constituent structure This volume provides a state of the art introduction to the framework Various chapters discuss basic assumptions and formal foundations describe the evolution of the framework and go into the details of the main syntactic phenomena Further chapters are devoted to non syntactic levels of description The book also considers related fields and research areas gesture sign languages computational linguistics and includes chapters comparing HPSG with other frameworks Lexical Functional Grammar Categorical Grammar Construction Grammar Dependency Grammar and Minimalism **Biblical and Ancient Greek Linguistics, Volume 9** Stanley E. Porter,Matthew Brook O'Donnell,2021-01-18 Biblical and Ancient Greek Linguistics BAGL is an international journal that exists to further the application of modern linguistics to the study of Ancient and Biblical Greek with a particular focus on the analysis of texts including but not restricted to the Greek New Testament The journal is hosted by McMaster Divinity College and works in conjunction with its Centre for Biblical Linguistics Translation and Exegesis and the OpenText org organization www opentext org in the sponsoring of conferences and symposia open to scholars and students working in Greek linguistics who are interested in contributing to advancing the discussion and methods of the field of research BAGL is a refereed on line and print journal dedicated to distributing the results of significant research in the area of linguistic theory and application to biblical and ancient Greek and is open to all scholars not just those connected to the Centre and the OpenText org project **Linearization in Functional Discourse Grammar** Elnora ten Wolde,Riccardo Giomi,Kees Hengeveld,2025-06-16 This volume develops Functional Discourse Grammar s innovative and unique approach to constituent ordering both by refining some of its theoretical tenets and by applying it to data from a variety of languages including Brazilian Portuguese Dutch English European and South American Spanish Italian Tagalog Tahitian Tamil and Turkish This work will not only interest typologists working on theoretically oriented approaches to constituent order and linguistics working in these individual languages but also given Functional Discourse Grammar s intermediate position between formalist and functionalist models of language linguists working in both types of approaches FYL. Theory and typology of information packaging Niels Smit,2010 **Sentence Patterns in English and Hebrew** Ron Kuzar,2012-10-30 Sentence

Patterns in English and Hebrew offers an innovative perspective on sentential syntax in which sentence patterns are introduced as constructions within the general framework of Construction Grammar Drawing on naturally occurring data collected from the Internet the study challenges the prevailing view of predication as the sole mechanism of sentence formation and introduces the idea of patterning as a complementary sometimes even alternative mechanism Major sentence patterns of English and Hebrew are systematically presented targeting both their form and their function A contrastive analysis of the sentence patterns in these two languages results in postulating a typological group in which cognitive motivations are shown to account for both similarities and differences within the typology Sentence Patterns in English and Hebrew will appeal to scholars of constructional approaches cognitive linguistics typology syntax as well as anyone interested in English and Hebrew

A Grammar of Sheko Anne-Christie Hellenthal, 2010 This thesis investigates the grammar of Sheko an Omotic language spoken in southwest Ethiopia The study presents an analysis of the phonology morphology and syntax of the language amply

illustrated by examples The supplements contain a sample of texts and an extensive word list Among other things the author discusses the interrelation between gender definiteness and number in nominal morphology Some nominal morphology also occurs on verbal forms In the verb system stem formation aspectual and modal distinctions as well as stance marking are treated The language has a rich array of complex verb constructions such as medial clauses and serial verb constructions next to different types of subordinate clauses In relative clauses a resumptive pronoun may occur before the antecedent One of the divergent ways in which interrogatives are formed is by subtractive morphology i e dropping off a grammatical element which is obligatorily present in declaratives Furthermore subject clitics attach to a variety of hosts in correlation to information structure and focus These and a number of other issues make the work valuable for specialists of Omotic and Afroasiatic studies as well as for general linguists and anyone interested in the typology of language *General Linguistics*, 1998 **Algonquian and Iroquoian Linguistics**, 1998 **Encyclopedia of Language & Linguistics** E. K. Brown, 2006

 Rolf Kailuweit, 2008 The first part is comprised of seven articles dealing with possible applications of RRG to diachronic syntax and grammaticalization Beside an overview article the papers are mainly concerned with changes either in the interaction between topic focus structure and the Layered Structure of the Clause or in the selection of Privileged Syntactic Arguments and case assignment The second part consists of applications of RRG to Romance languages and most of these applications are mainly concerned with the syntax semantics interface Different aspects of verbs verbs as operators verbs as sentence predicates verb alternations and the syntactic and semantic structures they involve are analyzed from an RRG perspective A Grammar of Lalo Susanna Björverud, 1998 **Describing East-Asian Grammar**, 2000
