## **The Origin Of Capitalism A Longer View:**

The Origin of Capitalism Ellen Meiksins Wood,2002-06-17 Contains extensive new material especially on imperialism anti Eurocentric history capitalism and the nation state and the differences between capitalism and non capitalist commerce Traces the links between the origin of capitalism and globalization ecological degradation and the current agricultural crisis

The Origin of Capitalism Ellen Wood,2021 How did the dynamic economic system we know as capitalism develop among the peasants and lords of feudal Europe In The Origin of Capitalism a now classic work of history Ellen Meiksins Wood offers a clear and accessible introduction to the theories and debates concerning the birth of capitalism imperialism and the modern nation state Capitalism is not a natural and inevitable consequence of human nature nor simply an extension of age old practices of trade and commerce Rather it is a late and localized product of very specific historical conditions which required great transformations in social relations and in the relationship between humans and nature Handbook of Historical Sociology Gerard Delanty,Engin F Isin,2003-06-23 This Handbook consists of 26 chapters on historical sociology Part One is devoted to Foundations Part Two moves on to consider major approaches and Part Three is devoted to the major themes in historical sociology Systematic and informative it offers readers the most complete and authoritative guide to historical sociology

History, Politics and Theory in the Great Divergence Debate Olya Murphy,2023-12-31 World history suffers from a paucity of clearly articulated convincing explanations While the rise of postmodernism and challenges to Eurocentrism did lead to some important correctives the pendulum has swung too far the other direction with a corresponding danger of throwing the baby out with the bathwater We need careful theoretically informed debates about ways of organizing world history What constitutes a good historical explanation What should guide historians to choose relevant facts Which theoretical schools could be made useful and to what ends These questions are especially relevant to the main topic of this book the great divergence between the west and the rest of the world and how this historical rupture is to be explained The book provides extensive critical analyses of some of the key claims in world history analyzing their strengths as well as their major weaknesses too often rooted in insufficient familiarity of historians with theories they discard It also historicizes the field and the debates to partly account for what caused some theories to become more influential and others to fall into oblivion despite the fact that the more influential frameworks are seriously flawed and some of the more marginalized ideas are more coherent and plausible The book offers insights regarding the theoretical and political relevance of older debates about the transition to capitalism and historical materialism Three major schools of thought in world history are critically examined through an in depth theoretical and comparative analysis that has not been undertaken elsewhere the so called California School World Systems Analysis and Marxist theories of history capitalism and the transition from feudalism to capitalism Murphy argues that despite some of the more recent criticisms of older approaches to world history the older theories remain indispensable for the writing of world history and for coming to terms with issues of global poverty

inequality and eco catastrophe    **The End** Joel Wainwright,2025-11-25 How Marx provides new insights into our environmental crisis when read alongside Darwin In this pathbreaking study Joel Wainwright shows how deeply Darwin influenced Capital Marx's thinking about history and nature changed generating a distinctive ecological critique of capitalism as a social formation Marx even called Capital a study of natural history    **The New Imperialists** Colin Peter Mooers,2006 What right does any country have over another's policies and internal affairs and are they right to use military power to change them Interest in the geopolitics of the new imperialism has surged in recent years This broad and wide ranging collection of articles critically examines the main intellectual justifications for it and poses a number of challenging questions is preemptive regime change permissible even right in the name of military humanism and should military power be used to further the purported goals of human and women's rights and democracy globally In the aftermath of the events of September 11 2001 and the subsequent invasions of Afghanistan and Iraq there seems to be a shift away from multilateralism the inviolability of state sovereignty and the rule of international law In the New Imperialists it is argued that the rhetoric of human rights and women's rights democracy and good governance espoused by the defenders of this new doctrine is a rationalization for a new imperialism which will undermine the very political and moral values it purports to advance With

**Adventure Capitalism** Raymond Craib,2022-07-05 Imagine a capitalist paradise An island utopia governed solely by the rules of the market and inspired by the fictions of Ayn Rand and Robinson Crusoe Sound far fetched It may not be The past half century is littered with the remains of such experiments in what Raymond Craib calls libertarian exit Often dismissed as little more than the dreams of crazy rich Caucasians exit strategies have been tried out from the southwest Pacific to the Caribbean from the North Sea to the high seas often with dire consequences for local inhabitants Based on research in archives in the US the UK and Vanuatu as well as in FBI files acquired through the Freedom of Information Act Craib explores in careful detail the ideology and practice of libertarian exit and its place in the histories of contemporary capitalism decolonization empire and oceans and islands Adventure Capitalism is a global history that intersects with an array of figures Fidel Castro and the Koch brothers American segregationists and Melanesian socialists Honolulu based real estate speculators and British Special Branch spies soldiers of fortune and English lords Orange County engineers and Tongan navigators CIA operatives and CBS news executives and a new breed of techno utopians and an old guard of Honduran coup leaders This is not only a history of our time but given the new iterations of privatized exit seasteads free private cities and space colonization it is also a history of our future    **Colonial Shipwrights and Their World** Joseph F. Cullen,2003 Two thousand trees one ton of iron miles of rope yards of canvas and gallons of naval stores combined to create a New England built merchant vessel of one hundred tons Artisans sawed and shaped heated and hammered spun and stretched sheared and sewed these materials into a sea worthy ship In the estimation of many historians colonial ships were emblematic of early capitalism but attention to the construction of these vessels in colonial New England reveals a much more complex history

Shipwrights participated in primitive and highly personalized markets in timber iron and labor not with cash but through simple barter bills of exchange and book debt Apprentices journeymen slaves and servants traded on their familiar connections received payment in kind and followed the irregular clocks and calendars of the early modern world These varied practices persisted well into the eighteenth century and defined New England's economic culture Active participants in the dynamic Atlantic world shipwrights responded as much to the particularities of local economies a scarcity of cash immature financial institutions and the prevalence of small transactions in place of wholesale opportunities as to the dictates of global commodity chains At the same time however shipwrights participated in the increasing quantification and rationalization of the environment and of business they surveyed and divided the land they kept accounts and they supported various market regulations Through these efforts to gain greater control over their trade shipwrights reshaped the region's economic culture and lent credence to ideas that would later be identified with market liberalism and capitalism The seductive power of these ideas bestowed a semblance of order upon a chaotic economy and helped to obscure competing actors relationships and values at play in their marketplaces The colonial shipwright's world was simultaneously one of mixed realities and market dreams *Myths of Modernity* Elizabeth Dore, 2006-01-25 Combines Marxist and postmodern approaches to argue that patriarchy has provided the central organizing principle of Nicaraguan agrarian labor systems

**History and Revolution** Michael Haynes, Jim Wolfreys, 2007 In History and Revolution a group of respected historians confronts the conservative revisionist trends in historical enquiry that have been dominant in the last twenty years Ranging from an exploration of the English French and Russian revolutions and their treatment by revisionist historiography to the debates and themes arising from attempts to downplay revolution's role in history History and Revolution also engages with several prominent revisionist historians including Orlando Figes Conrad Russell and Simon Schama This important book shows the inability of revisionism to explain why millions are moved to act in defence of political causes and why specific political currents emerge and is a significant reassertion of the concept of revolution in human development *The Journal of Medieval and Early Modern Studies*, 2009 **Unravelling Gramsci** Adam Morton, 2007-02-20 Unravelling Gramsci makes extensive use of Antonio Gramsci's writings including his much overlooked pre prison journalism prison letters as well as his prison notebooks to provide a fresh approach to understanding his contemporary relevance in the current neoliberal world order Adam Morton examines in detail the themes of hegemony passive revolution and uneven development to provide a useful way of analysing the contemporary global political economy the project of neoliberalism processes of state formation and practices of resistance The book explores the theoretical and practical limitations of how Gramsci's ideas can be used today offering a broad insight into state formation and the international factors shaping hegemony within a capitalist framework *History of Political Thought*, 2007 **Unity**, 2008 **The State-Capital Nexus in the Global Crisis** Bastiaan van Apeldoorn, Naná de Graaff, Henk W. Overbeek, 2017-07-05 In the wake of the outbreak of the global crisis in

2008 many observers expected the state to assume command over a faltering neoliberal finance led model of capitalism We now know that this expectation was by and large mistaken There is indeed an ongoing re calibration of the state capital relations but in many instances the state has become more actively and more deeply involved in extending the reach of markets rather than in constraining markets in the interests of an equitable response to the crisis This volume offers both theoretical perspectives and empirical studies by a selection of leading Critical International Political Economy scholars on the question how and to what extent we are witnessing a return of the state and a transition towards a new phase of global capitalism The chapters cover a wide array of topics from the rise of China and other emerging economies of the Global South the role of state owned enterprises such as Sovereign Wealth Funds and National Oil Companies and global environmental politics to the role of labour in Europe and US grand strategy foreign policy making in the post Cold War period This book was published as a special issue of Globalizations
