**Meteorological Tsunamis: The U.S. East Coast and Other Coastal Regions** Ivica Vilibić, Sebastian Monserrat, Alexander B. Rabinovich, 2014-11-16 The

book encompasses a set of papers on meteorological tsunamis covering various aspects on this rare but potentially destructive multiresonant phenomenon Altogether an editorial and 15 contributions are part of this book eight of the contributions deal with different aspects of meteotsunamis along the U S East Coast and in the region of the Great Lakes including one paper introducing a new methodology in meteotsunami research Seven more papers are documenting meteotsunamis in various coastal areas of the world oceans All continents except Antarctica have been covered with the authors representing 11 countries Previously Published in Natural Hazards Volume 74 No 1 2014      **Monthly Weather Review** ,1905      Communicating Climate Science - HC 254 Great Britain. Parliament. House of Commons. Select Committee on Science and Technology,Great Britain: Parliament: House of Commons: Science and Technology Committee,Andrew Miller,2014-04-02 The Government is failing to clearly and effectively communicate climate science to the public There is little evidence of co ordination amongst Government government agencies and public bodies on communicating climate science despite various policies at national and regional level to mitigate and adapt to climate change The mandate to act on climate can only be maintained if the electorate are convinced that the Government is acting on the basis of strong scientific evidence Ministers therefore need to do more to demonstrate that is the case and consistently reflect the Government approach in all their communications especially with the media The report also criticises the BBC for its reporting on the issue It points out that BBC News teams continue to make mistakes in their coverage of climate science by giving opinions and scientific fact the same weight The BBC is called to develop clear editorial guidelines for all commentators and presenters on the facts of climate that should be used to challenge statements from either side of the climate policy debate that stray too far from the scientific facts It is important that climate science is presented separately from any subsequent policy response Government should work with the learned societies and national academies to develop a source of information on climate science that is discrete from policy delivery comprehensible to the general public and responsive to both current developments and uncertainties in the science      Flood Forecasting Thomas E.
