Gender

and Finance Ylva Baeckström, 2022-02-25 This book examines the world of finance and the role of gender within it. It looks at the financial services industry arguably the most powerful and remunerative sector that exists and shows how it was created by men for men. The author explains how historically women were excluded how minimal progress has been made and outlines how the sector still needs to change to function effectively in a modern equal opportunities world. Addressing gender

inequality in financial services is of utmost urgency and importance because of the extent to which it affects women in all stages of life. Women's exclusion in financial services is also mirrored by how men have been excluded from parenting through a similar set of societal expectations, government legislation and corporate policies. The author maintains that to succeed we need to address both financial services and parenting. To do so we need regulatory support. Because of its power and dominance the financial services industry has the opportunity to lead this change and to champion gender equal practices. These practices are economically beneficial to all participants not only female employees and consumers. We all need these benefits as we rebuild our economies following the COVID 19 pandemic. The book makes an important contribution to the critical and increasing awareness of gender concerns. It presents insights drawn from original research and data about gender biases. The book is an essential secondary text for a range of university courses including economics, finance and accounting, business studies and gender related courses as well as MBAs and Executive Education programmes that focus on gender in business. It is also a must read for policy makers, managers in financial services institutions and any other businesses that seek to attract the growing market of female consumers, employees and business leaders. **Best**

Analysing Architecture Simon Unwin, 2020-12-29 Now in its fifth edition *Analysing Architecture* has become internationally established as the best introduction to architecture. Aimed primarily at those studying architecture it offers a clear and accessible insight into the workings of this rich and fascinating subject. With copious illustrations from his own notebooks the author dissects examples from around the world and all periods of history to explain the underlying strategies in architectural design and show how drawing may be used as a medium for analysis. In this new edition *Analysing Architecture* has been revised and expanded. Notably the chapter on How Analysis Can Help Design has been redeveloped to clearly explain this crucially important aspect of study to a beginner readership. Four new chapters have been added to the section dealing with Themes in Spatial Organisation on Axis Grid Datum Place and Hidden Material from the Case Studies in previous editions has been redistributed amongst earlier chapters. The Introduction has been completely rewritten and the format of the whole book has been adjusted to allow for the inclusion of more and better illustrative examples. Works of architecture are instruments for managing, orchestrating, modifying our relationship with the world around us. They frame just about everything we do. Architecture is complex, subtle, frustrating but ultimately extremely rewarding. It can be a difficult discipline to get to grips with, nothing in school quite prepares anyone for the particular demands of an architecture course. But this book will help. www.instagram.com/analysingarchitecture

Exercises in Architecture Simon Unwin, 2022-08-01 This revised edition of *Exercises in Architecture* Learning to Think as an Architect is full of new content building on the success of the previous edition. All the original exercises have been revised and new ones added with the format changing to allow the inclusion of more supplementary material. The aim remains the same to help pre or early course architecture students begin and develop their ability to think as architects. Learning to do architecture is tricky. It involves awakening abilities that remain dormant in most people. It is like learning language for the first time a task made more mystifying by the fact that architecture deals not in words but in places, places to stand, to walk, to sit, to hide, to sleep, to cook, to eat, to work, to play, to worship. This book was written for those who want to be architects. It suggests a basis for early experiences in a school of architecture but it could also be used in secondary schools and colleges or as self-directed preparation for students in the months before entering professional education. *Exercises in Architecture* builds on and supplements the methodology for architectural analysis presented in the author's previous book *Analysing Architecture the Universal Language of Place*. Making fifth edition 2021 and demonstrated in his *Twenty Five Buildings Every Architect Should Understand* Routledge 2015.

Together the three books deal with the three aspects of learning any creative discipline 1 Analysing Architecture provides a methodology for analysis that develops an understanding of the way architecture works 2 Twenty Five Buildings explores and extends that methodology through analysis of examples as case studies and 3 Exercises in Architecture offers a way of expanding understanding and developing fluency by following a range of rudimentary and more sophisticated exercises Those who wish to become professional architects wherever in the world they might be must make a conscious effort to learn the universal language of architecture as place making to explore its powers and how they might be used The exercises in this book are designed to help *Financial Aid Review Committee (FARC)*.
