**Intelligence in Design '94** John S. Gero, Fay Sudweeks, 1994 Design is an important research topic in engineering and  
 architecture since it is not only a means of change but also one of the keystones of economic competitiveness and the  
 fundamental precursor to manufacturing However our understanding of design as a process and our ability to model it are  
 still very limited The development of computational models founded on the artificial intelligence paradigm has provided an  
 impetus for much of current design research both computational and cognitive Notwithstanding their immaturity noticeable  
 advances have been made both in extending our understanding of design and in developing tools based on that
