Mapping the Amazon Amanda M. Smith, 2021-05-01 An analysis of the political and ecological consequences of charting the Amazon River basin in narrative fiction Mapping the Amazon examines how widely read novels from twentieth century South America attempted to map the region for readers Authors such as Jos Eustasio Rivera R mulo Gallegos Mario Vargas Llosa C sar Calvo M rcio Souza and M rio de Andrade travelled to the Amazonian regions of their respective countries and encountered firsthand a forest divided and despoiled by the spatial logic of extractivism Writing against that logic they fill their novels with geographic human and ecological realities omitted from official accounts of the region Though the plots unfold after the height of the Amazon rubber boom 1850 1920 the authors construct landscapes marked by that first large scale exploitation of Amazonian biodiversity The material practices of rubber extraction resurface in the stories told about the removal of other plants seeds and minerals from the forest as well as its conversion into farmland Smith places the counter discursive impulses of each novel in dialogue with various modernizing projects that carve Amazonia into cultural and economic spaces border commissions extractive infrastructure school geography manuals Indigenous education programs and touristic propaganda Even the novel maps studied however have blind spots and Mapping the Amazon considers the legacy of such unintentional omissions today

Policing the Amazon

Vicente Riccio, Guilherme Lopes da Cunha, 2024-11-18 This edited collection discusses the rule of law in the Amazon and the capabilities of the region's sovereign states to police their territory considering security matters. Comprised of nine countries including a European Union member, the Amazon region features states facing political instability, poverty, social inequalities, high levels of corruption, and lack of trust by their populations. This context is aggravated by the presence of criminal organizations operating there and shaping transnational bonds. Notably, the world's foremost cocaine-producing countries Colombia, Peru, and Bolivia are located in the region, presenting related turmoil and instability. Moreover, as home to the largest rainforest on Earth and the widest biodiversity, the region is an object of concern due to environmental reasons. The protection of these natural resources, as well as the traditional peoples living there, is intertwined with issues of development, security, and policing. The book delves into questions on the international agenda such as how is it possible to sustain the rule of law in the Amazon. What are the states' capabilities for controlling the territory and enforcing the law? How do these states deal with the growing urban violence in the region? What are the capabilities of public authorities for proposing laws and policies and judicial systems to process, prevent, and suppress different crimes such as drug dealing, smuggling, human trafficking, terrorism, and environmental crimes? The book fills a gap in English language scholarship exploring the context of the rule of law in the Amazon and the impact on policing activities. It is ideal for a wide range of audiences, including policing scholars, law enforcement, and community leaders and students focusing on criminal justice and the Amazon.

Innovation and Entrepreneurship Ralph F. Brueggemann, Charles H. Matthews, 2015-03-12 This book presents a new model, the competency framework, for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation, and new venture creation capability. Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation management, and cross-disciplinary classes such as design thinking. Presented in a modular format, Innovation Entrepreneurship informs the future direction of people and technology as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation, and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.
