Framework Using AI and Computer Vision Haolin Xie,Yu Sun,2022 At present many video editing software have been created
but what they all have in common is that they require manual work to edit And it takes a lot of time and the user needs to
watch each frame before editing In this paper we have developed a program about AI intelligence The most important point
of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a
complete video Users only need to prepare the video they want to edit and a photo of the main character Then upload both to
the software and AI Intelligence will automatically edit it providing the user with a way to download and save it after editing
the main character they need we applied our application to an example video using the Marvel character Hawkeye as he
appears in End Game and tried many experiments with the clip eventually we tried many experiments with the clip and
finally got a video of our selected character The results show that this software saves the user a lot of time and is highly
efficient All operations are carried out by AI **Dominating Fantasy Football in 2025** Tom Geiser,2025-02-28 I
