Deep Learning for Engineers Tariq M. Arif, Md Adilur Rahim, 2024-02-28 Deep Learning for Engineers introduces the fundamental principles of deep learning along with an explanation of the basic elements required for understanding and applying deep learning models As a comprehensive guideline for applying deep learning models in practical settings this book features an easy to understand coding structure using Python and PyTorch with an in depth explanation of four typical deep learning case studies on image classification object detection semantic segmentation and image captioning The fundamentals of convolutional neural network CNN and recurrent neural network RNN architectures and their practical implementations in science and engineering are also discussed This book includes exercise problems for all case studies focusing on various fine tuning approaches in deep learning Science and engineering students at both undergraduate and graduate levels academic researchers and industry professionals will find the contents useful

Principles and Labs for Deep Learning Shih-Chia Huang, Trung-Hieu Le, 2021-07-06 Principles and Labs for Deep Learning provides the knowledge and techniques needed to help readers design and develop deep learning models Deep Learning techniques are introduced through theory comprehensively illustrated explained through the TensorFlow source code examples and analyzed through the visualization of results The structured methods and labs provided by Dr Huang and Dr Le enable readers to become proficient in TensorFlow to build deep Convolutional Neural Networks CNNs through custom APIs high level Keras APIs Keras Applications and TensorFlow Hub Each chapter has one corresponding Lab with step by step instruction to help the reader practice and accomplish a specific learning outcome Deep Learning has been successfully applied in diverse fields such as computer vision audio processing robotics natural language processing bioinformatics and chemistry Because of the huge scope of knowledge in Deep Learning a lot of time is required to understand and deploy useful working applications hence the importance of this new resource Both theory lessons and experiments are included in each chapter to introduce the techniques and provide source code examples to practice using them All Labs for this book are placed on GitHub to facilitate the download The book is written based on the assumption that the reader knows basic Python for programming and basic Machine Learning Introduces readers to the usefulness of neural networks and Deep Learning methods Provides readers with in depth understanding of the architecture and operation of Deep Convolutional Neural Networks Demonstrates the visualization needed for designing neural networks Provides readers with an in depth understanding of regression problems binary classification problems multi category classification problems Variational Auto Encoder Generative Adversarial Network and Object detection
