Whats Wrong With Climate Politics And How To Fix It:

What's Wrong with Climate Politics and How to Fix It Paul G. Harris, 2013-07-11 Governments have failed to stem global emissions of carbon dioxide and other greenhouse gases causing climate change Indeed climate changing pollution is increasing globally and will do so for decades to come without far more aggressive action What explains this failure to effectively tackle one of the world s most serious problems And what can we do about it To answer these questions Paul G Harris looks at climate politics as a doctor might look at a very sick patient He performs urgent diagnoses and prescribes vital treatments to revive our ailing planet before it s too late The book begins by diagnosing what s most wrong with climate politics including the anachronistic international system which encourages nations to fight for their narrowly perceived interests and makes major cuts in greenhouse pollution extraordinarily difficult the deadlock between the United States and China which together produce over one third of global greenhouse gas pollution but do little more than demand that the other act first and affluent lifestyles and overconsumption which are spreading rapidly from industrialized nations to the developing world The book then prescribes several remedies for the failed politics of climate change including a new kind of climate diplomacy with people at its center national policies that put the common but differentiated responsibilities of individuals alongside those of nations and a campaign for simultaneously enhancing human wellbeing and environmental sustainability While these treatments are aspirational they are not intended to be utopian As Harris shows they are genuine workable solutions to what ails the politics of climate change today

What's Wrong with the Europe Union and How to Fix It Simon Hix, 2008-04-07 The European Union seems incapable of undertaking economic reforms and defining its place in the world Public apathy towards the EU is also increasing as citizens feel isolated from the institutions in Brussels and see no way to influence European level decisions Taking a diagnosis and cure approach to the EU s difficulties Simon Hix tackles these problems with distinct clarity and open mindedness What the EU needs Hix contends is more open political competition This would promote policy innovation foster coalitions across the institutions provide incentives for the media to cover developments in Brussels and enable citizens to identify who governs in the EU and to take sides in policy debates The EU is ready for this new challenge The institutional reforms since the 1980s have transformed the EU into a more competitive polity and political battles and coalitions are developing inside and between the European Parliament the Council and the Commission This emerging politics should be more central to the Brussels policy process with clearer coalitions and identifiable winners and losers at least in the short term The risks are low because the EU has multiple checks and balances Yet the potential benefits are high as more open politics could enable the EU to overcome policy gridlock rebuild public support and reduce the democratic deficit This indispensable book will be of great interest to students of the European politics scholars policy makers and anyone concerned with the future of the European Union

Climate Change and American Foreign Policy Paul G. Harris, 2016-04-15 Now available in an

updated 2016 edition Climate Change and American Foreign Policy examines the actors institutions and ideas shaping U S policy on climate change global warming The book begins by introducing the issue of climate change in the context of U S foreign policy before critically evaluating U S policies and actions It then analyses the domestic and international politics of U S climate change policy covering such issues as science the presidency and Congress nongovernmental organizations diplomacy and the international negotiations leading to the Framework Convention on Climate Change and the Kyoto Protocol The book concludes by looking at the role of international norms in shaping U S climate change policy The

Politics of Unsustainability Ingolfur Blühdorn, Ian Welsh, 2008 Two decades after its launch by the UN Brundtland

Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of *Environmental Politics* *The Saturday Review of Politics, Literature, Science*
