*Development with Java* Satej Kumar Sahu, 2026-01-01 This is the first hands on guide that takes you from a simple Hello LLM to production ready microservices all within the JVM You'll integrate hosted models such as OpenAI's GPT 4 to run alternatives with Ollama or Jlama and embed them in Spring Boot or Quarkus apps for cloud or on-prem deployment You'll learn how prompt engineering patterns Retrieval Augmented Generation (RAG) vector stores such as Pinecone and Milvus and agentic workflows come together to solve real business problems Robust test suites CI/CD pipelines and security guardrails ensure your AI features reach production safely while detailed observability playbooks help you catch hallucinations before your users do You'll also explore DJL the future of machine learning in Java This book delivers runnable examples clean architectural diagrams and a GitHub repo you can clone on day one Whether you're modernizing a legacy platform or launching a green field service you'll have a roadmap for adding state-of-the-art generative AI without abandoning the language and ecosystem you rely on What You Will Learn Establish generative AI and LLM foundations Integrate hosted or local models using Spring Boot Quarkus LangChain4j Spring AI OpenAI Ollama and Jlama Craft effective prompts and implement RAG with Pinecone or Milvus for context-rich answers Build secure, observable, scalable AI microservices for cloud or on-prem deployment Test outputs add guardrails and monitor performance of LLMs and applications Explore advanced patterns such as agentic workflows, multimodal LLMs and practical image processing use cases Who This Book Is For Java developers, architects, DevOps engineers, and technical leads who need to add AI features to new or existing enterprise systems Data scientists and educators will also appreciate the code-first Java-centric approach

## **Education 7.0** KHRITISH SWARGIARY, 2026-01-08

The genesis of Education 7.0 stems from a confluence of personal and professional experiences that have profoundly shaped my perspective as an author, educator, and advocate for transformative learning. I, Khrithish Swargiary AKA KS Luminar, have traversed diverse educational landscapes from the resource-constrained classrooms of rural India to the cutting-edge innovation hubs of urban academia, witnessing the profound disparities and untapped potentials that technology can either exacerbate or ameliorate. This book represents the culmination of over a decade of research, reflection, and collaboration, motivated by an unshakeable belief that artificial intelligence, when ethically harnessed, can elevate education from a static institution to a dynamic, lifelong symbiosis between human intellect and machine intelligence. In an era where AI projections indicate the automation of up to 47% of routine cognitive tasks by 2030, as corroborated by global economic analyses, the imperative to redefine pedagogy becomes not merely academic but existential. My aim herein is to furnish a comprehensive, evidence-based roadmap that demystifies Education 7.0, rendering it accessible and implementable for a broad audience, from frontline educators integrating AI tutors in daily lessons to policymakers devising equitable infrastructure investments and learners cultivating critical engagement with digital tools. The narrative is structured with deliberate progression, commencing with definitional clarity in Chapter 1, which elucidates humanistic AI pedagogy through principles like symbiotic intelligence and ethical custodianship, advancing to technological underpinnings in Chapter 2.

including neural optimized systems and blockchain credentials exploring innovative methods in Chapter 3 such as AI augmented design thinking and empathy labs confronting ethical and practical challenges in Chapter 4 with mitigated strategies providing a pragmatic implementation guide in Chapter 5 envisioning futures through case studies in Chapter 6 and concluding with a call to symbiotic commitment Each chapter is fortified with empirical references theoretical frameworks and authentic elaborations to ensure scholarly integrity while avoiding unsubstantiated optimism by addressing real world hurdles like algorithmic bias mitigated through diverse datasets and psychological strains countered via AI monitored mindfulness protocols My alias KS Luminar embodies the luminar aspiration to illuminate paths forward inspired by my roots in Assam India where educational inequities first ignited my passion for inclusive innovation I am indebted to a constellation of influences academic collaborators who refined these ideas through rigorous discourse technologists who shared prototypes of BCIs and holograms and global ethicists whose critiques ensured a balanced view This preface is an overture to dialogue inviting readers to not only absorb but actively apply these insights for in the synthesis of human empathy and AI efficiency lies the promise of an education that is truly boundless resilient and profoundly human centered As we stand at this pivotal juncture on January 08 2026 let us commit to shaping a future where technology serves humanity's highest aspirations

**Inclusive Futures** Arif Perdana,Vijayakumar Bharathi S,Kanchan Patil,Grace Wangge,Sabina Satriyani Puspita,Wei Kang,2026-01-30 This book offers a comprehensive analysis of the role of diversity equity and inclusion DEI in the technology sector from a global perspective Comprising seven in depth chapters the book highlights inherent biases within technology and strategies for constructing inclusive products and services It takes on a forward looking outlook on the future of DEI in technology visualizing a world in which technology functions as a unifying force for positive social transformation The authors examine DEI and their significance across different regions to enhance readers awareness and understanding This increased understanding is crucial for professionals and policymakers to make informed decisions that foster an inclusive technological environment The book equips the readers with knowledge to identify and address these biases in technology including algorithms datasets and user interfaces through an in depth study of such biases This is particularly valuable for technology developers designers and companies that aim to create fair and unbiased technology products and services Through the global and local case studies and empirical research readers learn valuable insights to developing inclusive technology products and services that cater to a diverse range of users This book also addresses recruitment practices and cultural changes necessary within tech organizations to cultivate a diverse and inclusive workforce The topic of how technology can bridge the digital divide and empower underrepresented communities is studied providing new ideas for such initiatives in the future This book serves as a valuable resource for practitioners involved in the development of technology hiring in the technology sector and leaders involved in policymaking of ethical and regulatory aspects of DEI in technology

**The Regula as a Rhetorical Device in Roman Law** Olga Tellegen-Couperus,Jan Willem

Tellegen,2024-12-09 In this book it is argued that twenty regulae in title D 50 17 of Justinian's Digest are not the legal rules that scholarly wisdom has long held them to be but are instead rhetorical arguments. As arguments these regulae do not comfortably fit the modern perception of Roman law as a system and sometimes even appear to have no connection with law whatsoever. By explaining them in the context of rhetoric and of Cicero's *Topica* especially the authors identify and reconstruct the original tenor of these twenty regulae as well as that of the famous regula Catoniana stating their case for a paradigm shift in the study of Roman law in the process. [Empire of AI](#) Karen Hao, 2025-05-20 A New York Times Notable Book Finalist for the National Book Critics Circle Award An Instant New York Times Bestseller Named a Best Book of the Year by Smithsonian and Scientific American A bestselling page turner that has made waves not just in Silicon Valley but around the world. With *Empire of AI* Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad

guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we ve seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era **Valuing the Future** Jose P Skinner,2025-10-04 In 2025 OpenAI shocked the world by closing a secondary share sale worth 6 6 billion sending its value soaring to an unprecedented OpenAI valuation of 500 billion For employees and investors it was more than a payday it was a signal of how fast the future of artificial intelligence is reshaping money power and technology Valuing the Future The Story Behind OpenAI s 500 Billion Leap takes you inside this record breaking deal and explains why it matters for anyone who cares about the intersection of AI and finance This book unpacks how AI investing is rewriting the rules of startup valuation how insiders and funds approach private company funding and why terms like cap table and diluted valuation have become part of everyday conversations in the tech world It sheds light on the unique structures behind OpenAI explores the mechanics of funding rounds explained and offers clarity on what an equity sale in tech really means for founders employees and outside investors Readers will benefit from understanding how valuation multiples are applied in real scenarios why tech company finance looks different in the AI era and what it means for future AI business strategy You ll see the investor perspective AI firms bring when joining billion dollar deals and how tech sector valuation is influenced by hype risk and performance By exploring OpenAI s path from a nonprofit lab to a half trillion dollar powerhouse this book also illustrates how AI startups grow tracks OpenAI s funding history and examines the forces driving AI capital markets Along the way it highlights the growing role of enterprise AI investments explains finance for AI founders and clarifies why debates over AI corporate structure influence long term sustainability With insights drawn from AI investors 2025 insider commentary and market analysis readers will gain a balanced understanding of what happens behind closed doors when trillions in future value are at stake The book also explores internal investor sentiment helping readers see why employees and early shareholders sometimes hold instead of selling even when fortunes are on the table Whether you re an entrepreneur investor student or simply curious about the forces shaping our future this book gives you the knowledge to navigate one of the most important financial stories of our time It connects the mechanics of money with the promise of AI and offers a clear look at where technology and finance meet **Openai** Gerard Blokdyk,2017-11-21 Which individuals teams or departments will be involved in OpenAI If substitutes have been appointed have they been briefed on the OpenAI goals and received regular communications as to the progress to date How can the value of OpenAI be defined What is our formula for success in OpenAI What is the total cost related to deploying OpenAI including any consulting or professional services Defining designing creating and implementing a process to solve a business challenge or meet a business objective is the most
