Shobha,2016-04-07 This book has more than 3100 multiplication facts for daily practice by students Each page has 2 different sets consisting of 18 problems each It is recommended for students to attempt 1 set daily for consistent practice Book starts and ends with times table charts for easy reference followed by some quick multiplication facts Once students start gaining confidence in individual facts they can attempt mixed facts Book can be used to track practice time for each set Date and time can be recorded at top of each page Answer to each problem is given at the end of the book Knowing multiplication facts is helpful not only in academics we frequently use multiplication in our daily lives too Just like learning to walk before you can run learning multiplication and familiarizing yourself with numbers are building blocks for other math topics taught in school such as division long multiplication fractions and algebra Mastering the basic math facts develops automaticity in kids Automaticity is the ability to do things without occupying the mind with the low level details that are required this is usually the result of consistent learning repetition and practice For instance an experienced cyclist does not have to concentrate on turning the pedals balancing and holding on to the handlebars Instead those processes are automatic and the cyclist can concentrate on watching the road the traffic and other surroundings Until students have developed sufficient sensory cognitive tools supporting access to symbolic memory they will not be able to image store or retrieve all of the basic facts with automaticity Therefore students need a comprehensive developmental and multi sensory structured system for developing automaticity with the facts     **Applying Brain Research and Technology to Engage Today's**
