**Entertained or Else** Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty first century and demonstrates how networked media have developed new technical means of capitalizing on boredom's state of suspension to make it into a source of value creation Focusing on the discursive technological and affective structures that encourage users to be entertaining and to remain entertained the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks It identifies the range of cultural techniques for codifying classifying sensing and pre-empting boredom as well as those that teach users counter-intuitively to embrace boring media as a means of coping with the intensities of always-on existence However if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds it is important to ask how else it might operate While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism this book attempts to think about the potential that might still be embedded in boredom's capacity to temporarily suspend or to neutralize dominant structures of attention and affect Building on the work of Giorgio Agamben Byung Chul Han Roland Barthes and from historical accounts of boredom and entertainment the book provides a new understanding of boredom in the context of networked media

*The Sweet Spot* Paul Bloom, 2021-11-02 This book will challenge you to rethink your vision of a good life With sharp insights and lucid prose Paul Bloom makes a captivating case that pain and suffering are essential to happiness It s an exhilarating antidote to toxic positivity Adam Grant 1 New York Times bestselling author of *Think Again* and host of the TED podcast *WorkLife* One of Behavioral Scientist s Notable Books of 2021 From the author of *Against Empathy* a different kind of happiness book one that shows us how suffering is an essential source of both pleasure and meaning in our lives Why do we so often seek out physical pain and emotional turmoil We go to movies that make us cry or scream or gag We poke at sores eat spicy foods immerse ourselves in hot baths run marathons Some of us even seek out pain and humiliation in sexual role play Where do these seemingly perverse appetites come from Drawing on groundbreaking findings from psychology and brain science *The Sweet Spot* shows how the right kind of suffering sets the stage for enhanced pleasure Pain can distract us from our anxieties and help us transcend the self Choosing to suffer can serve social goals it can display how tough we are or conversely can function as a cry for help Feelings of fear and sadness are part of the pleasure of immersing ourselves in play and fantasy and can provide certain moral satisfactions And effort struggle and difficulty can in the right contexts lead to the joys of mastery and flow But suffering plays a deeper role as well We are not natural hedonists a good life involves more than pleasure People seek lives of meaning and significance we aspire to rich relationships and satisfying pursuits and this requires some amount of struggle anxiety and loss Brilliantly argued witty and humane Paul Bloom shows how a life without chosen suffering would be empty and worse than that boring
